Learn Generative AI with PyTorch Mark Liu,2025-01-28 Learn how generative AI works by building your very own models that can write coherent text create realistic images and even make lifelike music Learn Generative AI with PyTorch teaches the underlying mechanics of generative AI by building working AI models from scratch Throughout you ll use the intuitive

PyTorch framework that's instantly familiar to anyone who's worked with Python data tools. Along the way you'll master the fundamentals of General Adversarial Networks (GANs), Transformers, Large Language Models (LLMs), variational autoencoders, diffusion models, LangChain, and more. In *Learn Generative AI with PyTorch*, you'll build these amazing models: A simple English to French translator, A text generating model as powerful as GPT-2, A diffusion model that produces realistic flower images, Music generators using GANs and Transformers, An image style transfer model, A zero-shot know-it-all agent. The generative AI projects you create use the same underlying techniques and technologies as full-scale models like GPT-4 and Stable Diffusion. You don't need to be a machine learning expert; you can get started with just some basic Python programming skills.

About the technology: Transformers, Generative Adversarial Networks (GANs), diffusion models, LLMs, and other powerful deep learning patterns have radically changed the way we manipulate text, images, and sound. Generative AI may seem like magic at first, but with a little Python, the PyTorch framework, and some practice, you can build interesting and useful models that will train and run on your laptop. This book shows you how.

About the book: *Learn Generative AI with PyTorch* introduces the underlying mechanics of generative AI by helping you build your own working AI models. You'll begin by creating simple images using a GAN and then progress to writing a language translation transformer line by line. As you work through the fun and fascinating projects, you'll train models to create anime images, write like Hemingway, make music like Mozart, and more. You just need Python and a few machine learning basics to get started. You'll learn the rest as you go.

What's inside: Build an English to French translator, Create a text generation LLM, Train a diffusion model to produce high-resolution images, Music generators using GANs and Transformers.

About the reader: Examples use simple Python. No deep learning experience required.

About the author: Mark Liu is the founding director of the Master of Science in Finance program at the University of Kentucky. The technical editor on this book was Emmanuel Maggiori.
