critical for today's managerial leader. It builds a solid foundation while it guides readers in strategies to enhance their written and interpersonal communication skills. Most research has stated and the author has found true in her own managerial leadership roles: a leader spends the majority of his or her day interacting with others. As managerial leaders, individuals face many challenging situations such as determining how to inspire a shared vision about goals and objectives, building trust within their unit, listening with an open mind, giving feedback, and encouraging collaboration, to name a few. The focus switches for the managerial leader from doing things to leading others. Therefore, this book is for anyone who currently serves as a managerial leader or for anyone who desires to manage and lead others. Most managerial communication books focus on the important written and oral communication skills. While the author believes these skills are critically important, she found in her role as a managerial leader she devoted the majority of her time to interpersonal communication. Leaders need to build teams and to maintain relationships with all stakeholders. The best way to make that happen is through skills such as listening, asking questions, and giving feedback. Therefore, this book includes an emphasis on interpersonal communication. As Chris M. Martin stated in a recent article, "The ability to communicate effectively may be the number one management quality." Therefore, this book will raise awareness relative to oral, written, and interpersonal communication skills so that individuals can become better managerial leaders.
