What makes the 21st century different from the 20th century This century is the century of extremes political economic social and global black swan events happening with increasing frequency and severity Book of Extremes is a tour of the current reality as seen through the lens of complexity theory the only theory capable of explaining why the Arab Spring happened and why it will happen again why social networks in the virtual world behave like flashmobs in the physical world why financial bubbles blow up in our faces and will grow and burst again why the rich get richer and will continue to get richer regardless of governmental policies why the future of economic wealth and national power lies in comparative advantage and global trade why natural disasters will continue to get bigger and happen more frequently and why the Internet invented by the US is headed for a global monopoly controlled by a non US corporation It is also about the extreme innovations and heroic innovators yet to be discovered and recognized over the next 100 years Complexity theory combines the predictable with the unpredictable It assumes a nonlinear world of long tailed distributions instead of the classical linear world of normal distributions In the complex 21st century almost nothing is linear or normal Instead the world is highly connected conditional nonlinear fractal and punctuated Life in the 21st century is a long tailed random walk Levy walks through extreme events of unprecedented impact It is an exciting time to be alive The Pint of No Return Ellie Alexander, 2018-10-02
