Watson, 2023-02-07 With so much of our lives lived online we've never been more connected or disconnected from what's most important to us It's time to let go of our curated online worlds and get beyond our need for likes For all that we think we're getting out of social media we're also getting duped The perfection echo chamber oftentimes makes us feel like we're getting left behind The truth is life is messy but curated online fabulousness makes it hard to let our true selves show and it impedes our ability to have real meaningful connections Depression anxiety and suicide are also on the rise and the virtual world is partially to blame affecting our self-worth our friendships and the way we choose to navigate our real lives As the founder and CEO of Squad an app company built on connectedness Isa Watson knows firsthand why we need to learn how to be more genuine The digital world is her lifeblood but it's also been an Achilles heel She struggled privately with some of the biggest challenges life can throw at you while online she seemed to be living her best life earning high profile accolades taking fabulous trips and partying with the likes of many big name celebrities It took a personal crisis to make her realize that she needed to change In *Life Beyond Likes* she gets real sharing practical guidance on Getting over the addiction to likes and letting your true self shine Recognizing your own damaging habits and developing healthy ones Determining when a friendship has run its course Getting comfortable with discomfort in order to make real connections Drawing from a wealth of experiences including being the youngest published chemist in the world working as executive in the upper echelons at JPMorgan Chase and founding her own company Isa helps readers better understand what constitutes success identify what's really important and achieve a balance between the curated online world and the enriching emotionally nourishing world right in front of us [The Pregnancy Experience](#) McKenzie Nelson, 2024-08-07 In 2023 there were about 368 000 births daily in the world With today's scientific competencies every single one of those people was birthed by a woman So why is

there still so much mystery involved in the process Your body is hardwired to do this but that doesn't mean you have any idea what you're about to go through Why did I not know what to mentally prepare myself for during the growth and delivery of my baby Why did I have no idea what would happen to me at the hospital Why did I think my body was done with baby things after forty weeks Why has the normal-for-advice passed down woman-to-woman about pregnancy become Yes it'll hurt but you don't remember that in the end or four hundred plus page books that take forever to read and are more biology than helpful tips And why have we as a society written that off as okay We would never expect someone to go into a new job with little to no instruction And when a new employee asks hard-hitting questions in detail and points out faults in the process for correction we give them an award we don't pointedly avoid their questions and tell them this is how things are So why are so many women expected to go into the hospital blind not having any idea what to expect during their delivery besides you push and a baby pops out You are going through a fast-paced life-altering experience so you need a fast-paced guide on what to expect for the near future and what you should know to expect from your body and mind during this wonderful experience The birth of my child was fully worth everything I went through in this book however I could have experienced less fear anxiety and emotional strain with my husband during my pregnancy had I known what to expect and prepare for from preconception to postbirth normalcy
