numerous accolades for its features and showcase of modern technology. Samsung Galaxy S20 FE Michael Brick, 2020-11-12. The Samsung Galaxy S20 FE User Guide. The Samsung Galaxy S20 FE comes in various colors such as cloud white, cloud pink, cosmic gray, and cloud blue version. There are a couple of things to note about the build of this phone. First of all, the back of the phone is not glass but plastic, and I think that's one of the things that Samsung has chosen to do to get the price down, which is a great move as they're less prone to breaking when dropped, and they make the phone a lot lighter than if they had a glass. Although the cloud white doesn't even look like plastic since they have a matte coating on it to fight the good fight against those fingerprints, it looks very clean, no matter what light you have on it. Samsung made sure that the FE is both IP68 rated for water and dust resistance, which is great. The camera module on the back doesn't stick out nearly as much as other recent Samsung phones, either. We'll talk about the triple camera system in a bit, but for now, let's flip the phone over and talk about the display. The S20 FE has a huge 6.5-inch Super AMOLED 1080p display that runs at any high refresh rate of 120 hertz. The display on the FE is also flat; the bezels on the phone are also completely asymmetrical: the sides are the thinnest, the top is a little bit thicker, and then the bottom is the thickest. It has excellent colors and contrasts from the AMOLED nature, and the high refresh rate makes using the phone a very fluid experience. The speakers on the FE are great in terms of clarity with the mids and highs. For the camera, there's a 12 megapixel wide-angle, a 12 megapixel telephoto, and a 12 megapixel ultra-wide. This does seem a little cut down from the huge 108 megapixels wide from the Note 20 Ultra, and even the 64 megapixel telephoto camera on the S20, but in real-world usage, the photos and videos coming from the rear cameras are pretty decent. The S20 FE comes with a pretty big 4500 mAh battery for battery life, no matter which version you get. You can get a screen time of around five hours before needing to recharge. The phone can wirelessly fast charge at up to 15 watts fast charge via USB-C and up to 25 watts in reverse wireless charge.
