Art History in the Age of Artificial Intelligence James Hutson,2025-10-11 This book examines how artificial intelligence is transforming museums and art historical research by enhancing visitor inclusivity scholarly innovation and pedagogical practices Chapters explore practical implementations of intelligent technologies addressing accessibility data driven research ethical frameworks administrative leadership and immersive digital learning Combining theoretical insights with case studies and practical guidelines it offers a comprehensive roadmap for responsibly integrating AI across art museums scholarship and education

Remote Sensing Applications in Oceanography with Deep Learning Muhammad Yasir,Shah Nazir,Chao Chen ,Weimin Huang,2025-10-30 Remote sensing technology has revolutionized ocean exploration allowing researchers to monitor and understand various oceanographic processes and phenomena on a global scale Remote sensing which involves the use of satellites and aircraft to collect data about the planet s surface and atmosphere enables scientists to monitor oceanic conditions in real time track changes in sea level and analyse marine ecosystems Deep learning plays a pivotal role in enhancing remote sensing technology revolutionizing how we collect interpret and utilize vast amounts of environmental data By leveraging deep learning remote sensing can identify subtle patterns and anomalies that traditional methods might miss such as climate change impacts Together remote sensing and ocean exploration enhance our ability to protect marine environments sustain biodiversity and address global challenges like climate change and sustainable development These advancements not only deepen our scientific knowledge but also inform policy decisions and conservation efforts ensuring the health and resilience of the world s oceans for future generations This Research Topic compiles the latest research and developments in the application of remote sensing techniques particularly using deep learning methods to improve our understanding of the oceans We invite original research articles reviews and case studies on the following topics Advanced remote sensing techniques for ocean observation including deep learning based approaches Integration of satellite aerial and in situ data for oceanographic

studies using deep learning Machine learning and artificial intelligence algorithms optimized for ocean remote sensing Hyperspectral and multispectral imaging for marine applications enhanced by deep learning techniques SAR Synthetic Aperture Radar applications in oceanography with deep learning models Remote sensing of coastal and estuarine environments using deep learning architectures Monitoring of harmful algal blooms using deep learning algorithms applied to remote sensing data Deep learning based approaches for remote sensing of coral reefs and marine habitats Applications of deep learning in fisheries management utilizing remote sensing data Deep learning based assessment of climate change impacts on oceans using remote sensing datasets Manuscripts relating to practical applications in ecological monitoring and marine target tracking can be submitted to the Research Topic Remote Sensing Applications in Marine Ecology Monitoring and Target Sensing <https://www.frontiersin.org/research-topics/64528/remote-sensing-applications-in-marine-ecology-monitoring-and-target-sensing>

Artificial Intelligence in Architecture Matias del Campo, 2024-05-13 Artificial intelligence AI applications in architectural design have achieved a critical mass and exploded into the mainstream of architectural imaginations From practical applications in design and construction to the implications for architectural theory to a plethora of novel tools for accelerated morphological studies what has become clear is that the discipline is passing a threshold that fundamentally changes architecture as a whole However the most radical change is the interrogation and novel discussion of authorship and agency in design ecologies driven by synthetic imaginations What does it mean for authorship when more than 50 per cent of the content is generated by a nonhuman player This issue seems more pressing than ever In a world that is being transformed by AI on a daily basis what is the role of the sole genius and designers artists and architects This AD dives deep into current discussions about the human position in architectural design which is increasingly entangled in an AI driven design context Contributors Cesare Battelli Phil Bernstein Mario Carpo Benjamin Ennemoser and Ingrid Mayrhofer Hufnagl Sarah Fox Wanyu He Andrew Kudless Ryan Vincent Manning Sandra Manninger Kyle Steinfeld Andrew Witt and Michael Young

From Street-smart to Web-wise® Al Marcella, Brian Moore, Madeline Parisi, 2024-12-27 Book 2 continues as the tiny fingers in Book 1 Grades K 2 grow and become more familiar with online activities The critical job of ensuring our children's safety expands as students become more independent and begin to have greater online autonomy From Street smart to Web wise A Cyber Safety Training Manual Built for Teachers and Designed for Children isn't just another book it's a passionate call to action for teachers a roadmap to navigate the digital landscape safely with confidence and care Written by authors who are recognized experts in their respective fields this accessible manual is a timely resource for educators Dive into engaging content that illuminates the importance of cyber safety not only in our classrooms but extending into the global community Each chapter is filled with practical examples stimulating discussion points and ready to use lesson plans tailored for students in third and fourth grades Regardless of your technology skill level this book will provide you with the guidance and the tools you need to make student cyber safety awareness practical fun and impactful As parents partner with educators

to create cyber secure spaces this book stands as a framework of commitment to that partnership It s a testament to taking proactive steps in equipping our young learners with the awareness and skills they need to tread the digital world securely By choosing From Street smart to Web wise A Cyber Safety Training Manual Built for Teachers and Designed for Children you position yourself at the forefront of educational guardianship championing a future where our children can explore learn and grow online without fear Join us on this journey to empower the next generation one click at a time Artificial Intelligence in HCI Helmut Degen,Stavroula Ntoa,2023-07-08 This double volume book set constitutes the refereed proceedings of 4th International Conference AI HCI 2023 held as part of the 25th International Conference HCI International 2023 which was held virtually in Copenhagen Denmark in July 2023 The total of 1578 papers and 396 posters included in the HCII 2023 proceedings was carefully reviewed and selected from 7472 submissions The first volume focuses on topics related to Human Centered Artificial Intelligence explainability transparency and trustworthiness ethics and fairness as well as AI supported user experience design The second volume focuses on topics related to AI for language text and speech related tasks human AI collaboration AI for decision support and perception analysis and innovations in AI enabled systems

Nuclear Science Abstracts ,1973 Revolutionizing Pedagogy Through Smart Education Ruiz-Vanoye, Jorge A.,Díaz-Parra, Ocotlán,2025-02-05 The integration of emerging technologies and innovative teaching methods is transforming education making it more accessible inclusive and effective Smart education leverages tools like AI IoT and big data to personalize learning experiences improve student outcomes and empower educators These advancements not only enhance the quality of education but also address global challenges such as digital literacy and equitable access to learning resources By embracing these innovations society can build a more informed adaptable and skilled population equipped to thrive in the modern world Revolutionizing Pedagogy Through Smart Education provides a comprehensive understanding of what constitutes smart education It delves into its principles the technological advancements underpinning it and how these can be harnessed to create more effective and engaging learning environments Covering topics such as artificial intelligence AI online learning platforms and virtual reality VR this book is an excellent resource for educators researchers academicians policymakers technology developers and more **Scientific and Technical Aerospace Reports** ,1995 *Generative AI* N. Gayathri,S. Rakesh Kumar,Ramesh Chandran,Pethuru Raj,Danilo Pelusi,2025-05-28 This book is essential for anyone eager to understand the groundbreaking advancements in generative AI and its transformative effects across industries making it a valuable resource for both professional growth and creative inspiration Generative AI Disruptive Technologies for Innovative Applications delves into the exciting and rapidly evolving world of generative artificial intelligence and its profound impact on various industries and domains This comprehensive volume brings together leading experts and researchers to explore the cutting edge advancements applications and implications of generative AI technologies This volume provides an in depth exploration of generative AI which encompasses a range of techniques such as generative

adversarial networks recurrent neural networks and transformer models like GPT 3 It examines how these technologies enable machines to generate content including text images and audio that closely mimics human creativity and intelligence Readers will gain valuable insights into the fundamentals of generative AI innovative applications ethical and social considerations interdisciplinary insights and future directions of this invaluable emerging technology Generative AI Disruptive Technologies for Innovative Applications is an indispensable resource for researchers practitioners and anyone interested in the transformative potential of generative AI in revolutionizing industries unleashing creativity and pushing the boundaries of what's possible in artificial intelligence Audience AI researchers industry professionals data scientists machine learning experts students policymakers and entrepreneurs interested in the innovative field of generative AI
