History of Strategic Air and Ballistic Missile Defense: 1956-1972 ,2009 From the book's Foreword In the early 1970s the U S Army Center of Military History contracted with BDM Corporation for a history of U S efforts to counter Soviet air and missile threats during the Cold War The resulting two volume History of Strategic Air and Ballistic Missile Defense covers the years 1945-1972 when the strategic arms competition between the United States and the Soviet Union was at its height The study was first published for limited distribution in 1975 and recently declassified with minimal redaction These volumes address the passive and active defense strategies technologies and techniques adopted by both U S and Soviet defense planners Much of their actions centered around three common questions How might we be attacked How shall we defend our country What can technology do to solve the basic problems of defending against this new intercontinental threat

History of Strategic Air and Ballistic Missile Defense ,2009 US Strategic and Defensive Missile Systems 1950-2004 Mark Berhow, 2012-09-20 For 40 years following the end of World War II the Western democratic governments and the Eastern Bloc Communist powers were locked in the ideological political and economic struggle of the Cold War The

United States and the Soviet Union developed missile systems capable of delivering conventional and nuclear explosives against enemy massed bomber formations in the air and of delivering retaliatory nuclear payloads against ground targets located on distant continents. The missile systems played both a defensive role and a potential offensive role which was parlayed to the public as deterrence against attack by the rival bloc. This illustrated guide provides a detailed overview of the fixed launch site strategic missile systems of the United States. The Armed Forces Report United States. Assessing the Threat of Weapons of Mass Destruction John L. Finney, Ivo Šlaus, 2010. This is a collection of papers delivered at the NATO Advanced Research Workshop of the same name which examined the role of independent scientists in assessing WMD threat. Such threat assessment has a profound impact on the policies of governments and international organizations. With papers covering topics ranging from policy making to chemical and biological weapons, nuclear threats and breaking the threat or counter threat cycle, this book illuminates an area of vital importance to the security and stability of relations between states and the maintenance of internationally agreed norms.

History of Strategic and Ballistic Missile Defense: Volume II Barry Leonard, 2011. This is a print on demand edition of a hard to find publication. This is the second of two volumes on the history of strategic air and ballistic missile defense from 1945 to 1972. It covers 1955-1972 and is organized into five interrelated chapters. Chapter I provides a comparison of U.S. and Soviet strategies. Chapters II and III deal with U.S. strategy and Soviet strategy while Chapters IV and V cover U.S. systems and Soviet systems. The Executive Summary has three major groupings: one to reflect the contextual setting of decision making circa 1955, the second to highlight strategic air defense policy comparisons and contrasts 1955-1972, and a third to present judgments and conclusions about the results of the play of factors and perceptions which molded air defense decisions during these years.

Council of War Steven L. Rearden, 2012. Established during World War II to advise the President on the strategic direction of the Armed Forces of the United States, the Joint Chiefs of Staff (JCS) continued in existence after the war and as military advisers and planners have played a significant role in the development of national policy. Knowledge of JCS relations with the President, the Secretary of Defense, and the National Security Council is essential to an understanding of the current work of the Chairman and the Joint Staff. A history of their activities both in war and peacetime also provides important insights into the military history of the United States. For these reasons, the Joint Chiefs of Staff directed that an official history of their activities be kept for the record, its value for instructional purposes for the orientation of officers newly assigned to the JCS organization, and as a source of information for staff studies is self apparent.

Council of War: A History of the Joint Chiefs of Staff 1942-1991 follows in the tradition of volumes previously prepared by the Joint History Office dealing

with JCS involvement in national policy the Korean War and the Vietnam War Adopting a broader view than earlier volumes it surveys the JCS role and contributions from the early days of World War ii through the end of the Cold War Written from a combination of primary and secondary sources it is a fresh work of scholarship looking at the problems of this era and their military implications The main prism is that of the Joint Chiefs of Staff but in laying out the JCS perspective it deals also with the wider impact of key decisions and the ensuing policies *News Release* United States. Launius,2006 In March 2005 the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history This volume is a collection of essays based on those deliberations The meeting took place at a time of extraordinary transformation for NASA stemming from the new Vision of Space Exploration announced by President George W Bush in January 2004 to go to the Moon Mars and beyond This Vision in turn stemmed from a deep reevaluation of NASA s goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board The new goals were seen as initiating a New Age of Exploration and were placed in the context of the importance of exploration and discovery to the American experiences Amazon
