comprehensive overview of this field conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities It illustrates disciplinary trends and pathways from migration studies and transport history to communications research featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies It explores the dominant figures of mobility from children to soldiers and the mobility impaired the disparate materialities of mobility such as flows of water and waste to the vectors of viruses key infrastructures such as logistics systems to the informal services of megacity slums and the important mobility events around which our world turns from going on vacation to the commute to the catastrophic disruption of mobility systems The text is forward thinking projecting the future of mobilities as they might be lived transformed and studied and possibly brought to an end International in focus the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives different fields countries and standpoints This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study *A Geographical Century* Vladimir Kolosov, Jacobo García-Álvarez, Michael Heffernan, Bruno Schelhaas, 2022-05-31 This volume of specially commissioned interpretative essays marks the centenary of the establishment of the International Geographical Union in 1922 Written by leading human and physical geographers from all parts of the world *A Geographical Century* considers the history and present condition of geography as an international science Based on the latest research *A Geographical Century* provides new and critical analyses of the different forms of geographical internationalism that emerged during the 20th century the changing relations between geography and cognate disciplines in the natural and social sciences the geopolitics of international geographical collaboration and the prospects of geography as a 21st century international science Occupy the Earth Liam Leonard, Sya B. Kedzior, 2014-12-03 Concerns about environmental risks have focused the minds of a generation New movements are emerging to challenge those who would put profits before the planet This volume represents the cutting edge of international research on global environmental movements and contributes to the on going debates which may shape our future Fostering Transformative Research in the Geographical Sciences National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Geographical Sciences Committee, Committee on Identifying Transformative Research in the Geographical Sciences, 2019-03-22 The central purpose of all research is to create new knowledge In the geographical sciences this is driven by a desire to create new knowledge about the relations between space place and the anthropogenic and non anthropogenic features and processes of the Earth But some research goes beyond these modest aims and creates new opportunities for further research or affects the process of knowledge acquisition more broadly or changes the way other researchers in a domain think about the world and go about their business Due to its positive impacts transformative research can be regarded as inherently having greater value than more conventional research and funding agencies clearly regard transformative research as something to be encouraged and

funded through special programs Assessments of transformative research funding initiatives are few and provide a mixed picture of their effectiveness The challenge is whether transformative research can be identified at the time it is proposed rather than after it has been conducted communicated and its influence on the discipline has become clear Fostering Transformative Research in the Geographical Sciences reviews how transformative research has emerged in the past what its early markers were and makes recommendations for how it can be nurtured in the future
