NDU Journal ,2019 *International Conflict Analysis in South Asia* Safeer Tariq Bhatti, 2016 International Conflict Analysis in South Asia A Study of Sectarian Violence in Pakistan analyzes the ideological relationship of the Muslim identity to its perceived practice of Islam among the Shia and Deobandi sects A Muslim identity defined as the parameters of who is and who isn't a Muslim has led to the political conundrum of Pakistan to an anticipated single interpretation of Islam causing severe sectarian violence across the country Sectarianism has been rooted in Pakistan's affairs since 1953 but most recently the country has been victimized by political and sectarian Islamic movements The collective mobilization and propaganda campaigns of these movements have led exclusion of certain religious minorities and their practices The study takes root in Punjab Pakistan among twenty seven interviews where the Deobandi sect and the Shia sect face severe fatalities and undefined conflict

The Logic of American Nuclear Strategy Matthew Kroenig, 2018 For decades the reigning scholarly wisdom about nuclear weapons policy has been that the United States only needs the ability to absorb an enemy nuclear attack and still be able to respond with a devastating counterattack So long as the US or any other nation retains such an assured retaliation capability no sane leader would intentionally launch a nuclear attack against it and nuclear deterrence will hold According to this theory possessing more weapons than necessary for a second strike capability is illogical This argument is reasonable but when compared to the empirical record it raises an important puzzle Empirically we see that the United States has always maintained a nuclear posture that is much

more robust than a mere second strike capability In *The Logic of American Nuclear Strategy* Matthew Kroenig challenges the conventional wisdom and explains why a robust nuclear posture above and beyond a mere second strike capability contributes to a state's national security goals In fact when a state has a robust nuclear weapons force such a capability reduces its expected costs in a war provides it with bargaining leverage and ultimately enhances nuclear deterrence This book provides a novel theoretical explanation for why military nuclear advantages translate into geopolitical advantages In so doing it helps resolve one of the most intractable puzzles in international security studies Buoyed by an innovative thesis and a vast array of historical and quantitative evidence *The Logic of American Nuclear Strategy* will force scholars to reconsider their basic assumptions about the logic of nuclear deterrence *Non-traditional and Human Security in South Asia* ,2006

Contemporary Southeast Asia ,2005 **Decentralisation as a Means of Conflict Management** Anna Katharina Schelnberger,2005 *Asia Annual* ,2007 **Natural Resources Related Conflict Management in Southeast Asia** Suwit Laohasiriwong,Ming Chee Ang,2006 *Naval War College Review* ,2016 **Journal of Geographical Sciences** ,2006 **Broadening Asia's Security Discourse and Agenda** Ramesh Thakur,Ramesh Chandra Thakur,Edward Newman,2004 Going beyond military threats and state centric analysis this publication demonstrates the importance of a broad security agenda that incorporates political economic social and environmental dimensions *Journal of Peacebuilding & Development* ,2006 **Statebuilding and Intervention** David Chandler,2009 This edited book sets out and engages with some of the key policies practices and paradigms of external intervention in the case of state support and reconstruction Many assumptions about statebuilding have been reconsidered in the wake of Iraq and ongoing problems in other states such as Afghanistan Bosnia and Kosovo Rather than being a regional survey or a policy orientated lessons learned book this collection explores the broader framing of policy goals statebuilding practices and the consensus on the need for Western states and international institutions to be engaged in this policy area The volume is divided into three parts the first engages with some of the key policy frameworks and conceptual issues raised by recent statebuilding interventions the second considers core statebuilding practices and the third reconsiders statebuilding paradigms more broadly The essays open up debate and critical discussion in the field at a time when many advocates of extending statebuilding intervention suggest that the complex nature of the problems of non Western states and societies mean that it will inevitably be contradictory and limited in its results **Challenges to Peacebuilding** Edward Newman,Oliver P. Richmond,2006 Many ceasefires and peace agreements in civil conflict are initially unsuccessful Whilst some give way to renewed and often escalating violence others have become interminably protracted leading to lengthy negotiations in which concessions are rare Given the huge material and human costs of a failed peace process the international community has a strong interest in helping these processes succeed and addressing threats to their implementation This publication focuses on the groups and tactics referred to as spoilers that actively seek to obstruct or undermine conflict settlement through a variety of means including terrorism

and violence drawing upon experience from Northern Ireland the Basque region Bosnia Colombia Israel Palestine Cyprus the Caucasus and Kashmir It explores the concept of spoiling and spoiling behaviours from a broad range of interests involved including rebel groups and insurgents diasporas and governments considers how this can be addressed and demonstrates how ill conceived or imposed peace processes can themselves contribute to the problem Environmental Justice and Sustainability in the Former Soviet Union Julian Agyeman, Yelena Ogneva-Himmelberger, 2009 An examination of the awareness of environmental and social justice issues in the former Soviet republics from the Western style democracies of the Baltic region to the totalitarian regimes of Central Asia and the resulting activism in those states The legacy of environmental catastrophe in the states of the former Soviet Union includes desertification pollution and the toxic aftermath of industrial accidents the most notorious of which was the Chernobyl disaster of 1986 This book examines the development of environmental activism in Russia and the former Soviet republics in response to these problems and its effect on policy and planning It also shows that because of increasing economic ethnic and social inequality in the former Soviet states debates over environmental justice are beginning to come to the fore The book explores the varying environmental social political and economic circumstances of these countries which range from the Western style democracies of the Baltic states to the totalitarian regimes of Central Asia and how they affect the ecological environmental and public health Among the topics covered are environmentalism in Russia including the progressive nature of its laws on environmental protection which are undermined by overburdened and underpaid law enforcement the effect of oil wealth on Azerbaijan and Kazakhstan the role of nationalism in Latvian environmentalism the struggle of Russia's indigenous peoples for environmental justice public participation in Estonia's environmental movement and lack of access to natural capital in Tajikistan Environmental Justice and Sustainability in the Former Soviet Union makes clear that although fragile transition economies varying degrees of democratization and a focus on national security can stymie progress toward just sustainability the diverse states of the former Soviet Union are making some progress toward green and environmental justice issues separately
