

An aerial photograph of a large, turquoise-colored lake or reservoir situated in a vast, arid desert landscape. The water is a vibrant blue-green, contrasting sharply with the dry, brownish-yellow earth. The shoreline is irregular, with several small peninsulas and inlets. The surrounding terrain is characterized by deep, winding dry riverbeds and eroded hills. The sky is not visible, as the landscape fills the frame.

Transpecies Design Adrian Parr Zaretsky, Michael Zaretsky, 2024-07-31 In May 2019 the United Nations released the Global Assessment Report on Biodiversity and Ecosystem Services which warned that human activities will drive nearly one million species to extinction in a few decades The primary reasons for this are habitat loss and biodiversity demise caused by changing climate pollution introducing nonindigenous species clearing land over population and consumption Given this situation humans must change course as both human wellbeing and the wellbeing of other than human species are imbricated in one another One way humanity can accomplish the needed transformation is to move beyond an anthropocentric view of life by embracing a transpecies approach that is premised upon interconnected flourishing Transpecies design as outlined in this book offers a new approach to regenerating the natural environment while honoring biodiversity Rather than presenting the human experience as the goal of design transpecies design takes the inextricable linkages connecting living things as both its starting point and end goal As such it moves beyond human experience serving as the fundamental ingredient for making better design processes and decisions This book is essential reading for artists designers and architects as well as students of architecture landscape architecture interior architecture art product design urban design planning environmental philosophy and cultural studies

Life in the Market Ecosystem Stuart K. Hayashi, 2014-11-13 *Life in the Market Ecosystem* the second book in the *Nature of Liberty* trilogy confronts evolutionary psychology head on It describes the evolutionary psychologists theory of gene culture co evolution which states that although customs and culture are not predetermined by anyone s genetic makeup one s practice of a custom can influence the likelihood of that person having children and grandchildren Therefore according to the theory customs count as evolutionary adaptations Extending that theory further as entire systems of political economy capitalism socialism and hunter gatherer subsistence consist of multiple customs and institutions it follows that an entire political economic system can likewise be classified as an evolutionary adaptation Considering that liberal republican capitalism has insofar as the system has been implemented done more to reduce the mortality rate and secure human fertility than other models of societal structure it stands to reason that liberal republican capitalism is itself a beneficent evolutionary adaptation Moreover as essential tenets of Rand s Objectivism individualism observation based rationality and peaceable self interest have been integral to the development of the capitalist ecosystem important aspects of the Objectivism are worthwhile adaptations as well This book shall uphold that position as well as combat critiques by evolutionary psychologists and environmentalists who denounce capitalism as self destructive Instead capitalism is the most sustainable and fairest political model This book argues that of all the philosophies Objectivism is the one that is most fit for humanity
