Book Todays Sounds Yesterdays Films Audio Visual:

Today's Sounds for Yesterday's Films K.J. Donnelly, Ann-Kristin Wallengren, 2016-04-08 In recent years there has been something of an explosion in the performance of live music to silent films There is a wide range of films with live and new scores that run from the historically accurate orchestral scores to contemporary sounds by groups such as Pet Shop Boys or by experimental composers and gothic heavy metal bands It is no exaggeration to claim that music constitutes a bridge between the old silent film and the modern audience music is also a channel for non scholarly audiences to gain an appreciation of silent films Music has become a means both for musicians and audiences to understand this bygone film art anew This book is the first of its kind in that it aims to bring together writings and interviews to delineate the culture of providing music for silent films It not only has the character of a scholarly work but is also something of a manual in that it discusses how to make music for silent films *Haunted Soundtracks* Kevin J. Donnelly, Aimee Mollaghan, 2023-10-05 The turn of the millennium has heralded an outgrowth of culture that demonstrates an awareness of the ephemeral nature of history and the complexity underpinning the relationship between location and the past This has been especially apparent in the shifting relationship between landscape memory and sound in film television and other media The result is growing interest in soundtracks as part of audiovisual culture as well as an interest in the spectral aspects of culture more generally This collection of essays focuses on audiovisual forms that foreground landscape sound and memory The scope of inquiry emphasises the ghostly qualities of a certain body of soundtracks extending beyond merely the idea of scary films or haunted houses Rather the notion of sonic haunting is tied to ideas of trauma anxiety or nostalgia associated with spatial and temporal dislocation in contemporary society Touchstones for the approach are the concepts of psychogeography and hauntology pervasive and established critical strategies that are interrogated and refined in relation to the reification of the spectral within the soundtracks under consideration here **Silent Films/Loud Music** Phillip Johnston, 2021-08-12 *Silent Films Loud Music* discusses contemporary scores for silent film as a rich vehicle for experimentation in the relationship between music image and narrative Johnston offers an overview of the early history of music for silent film paired with his own first hand view of the craft of creating new original scores for historical silent films a unique form crossing musical boundaries of classical jazz rock electronic and folk As the first book completely devoted to the study of contemporary scores for silent film it tells the story of the historical and creative evolution of this art form and features an extended discussion and analysis of some of the most creative works of contemporary silent film scoring Johnston draws upon his own career in both contemporary film music working with directors Paul Mazursky Henry Bean Philip Haas and Doris D rrie among others and in creating new scores for silent films by Browning M li s Kinugasa Murnau Reiniger Through this book Johnston presents a discussion of music for silent films that contradicts long held assumptions about what silent film music is and must be with thought provoking implications for both historical and contemporary film music **Hearing Eyes, Seeing Ears** K.J.

Donnelly,2025-01-22 This book approaches music in audiovisual culture as a complex merged signal rather than as a simple addition to the images of film The audiovisual is central to modern culture with screens and speakers including headphones dominating communication leisure and drama While this book mostly addresses film it also deals with sister media such as television and video games registering that there is a common core of synchronized image and sound at the heart of these different but related media The traditions of sound and what Michel Chion calls audiovision 1994 including principles of accompaniment and industrial processes from film have been retained and developed in other media This book engages with the rich history and varied genres different traditions and variant strategies of audiovisual culture However it also points to and emphasizes the common core of flat moving images and synchronized sound and music which marks a dominant in electronic media culture what might be called screen and speaker diaphragm culture Addressing music as both diegetic and non diegetic as both songs and score the analyses presented in this book aim to attend the precise interaction between music and other elements of audiovisual culture as defining overall configurations While many writings about music in audiovisual culture focus on what it communicates its processes are more complicated and can form a crucial semi conscious or perhaps unconscious background While music s effect might be far from simple and unified part of screen music s startling effect comes from its unity with the image Cross modal crosstalk between sound and image forms a whole new signal of its own Each chapter marks a case study making for a varied collection that embraces rich history and different traditions as well as the distinct aesthetic boldness of different genres and formats
