Book Education Socialism Historical Current Perspectives:

Education in/for Socialism Tom Griffiths, Zsuzsa Millei, 2017-10-02 This book re-examines aspects of historical socialism and includes case studies of education within twenty-first century socialist and post-socialist contexts shaped by the trajectories of historical socialism. Through these case studies, contributions offer insights into key questions: How are education systems and student subjectivities shaped by post-socialist trajectories and current regional politics, economics, and resistance movements? How do sedimented socialist discourses and geographies alter and contest the neoliberal child and childhood in post-socialist education? How have disjunctures between the rhetoric of historical Marxism-Leninism and the practices of educators, students, and student political organizations played out under socialism, and what could we learn from that for our present? How much emancipatory potential is there in the theories and practices of popular education for combatting injustice in the absence of mass revolutionary political parties? Above all, this volume affirms the need to move beyond simplistic accounts of historical socialism and post-socialist transitions. By exploring how socialist trajectories remain influential and have potential in our current contexts, this book contributes to the work of politically engaged educators working to re-imagine and reconstruct education. This book was originally published as a special issue of *Globalisation Societies and Education*.

Childhood and Schooling in (Post)Socialist Societies Iveta Silova, Nelli Piattoeva, Zsuzsa Millei, 2017-12-07 This book explores childhood and schooling in late socialist societies by bringing into dialogue public narratives and personal memories that move beyond imaginaries of Cold War divisions between the East and West. Written by cultural insiders who were brought up and educated on the eastern side of the Iron Curtain, spanning from Central Europe to mainland Asia, the book offers insights into the diverse spaces of socialist childhoods interweaving with broader political, economic, and social life. These evocative memories explore the experiences of children in navigating state expectations to embody model socialist citizens and their mixed feelings of attachment, optimism, dullness, and alienation associated with participation in building socialist futures. Drawing on the research traditions of autobiography, autoethnography, and collective biography, the authors challenge what is often considered normal and natural in the historical accounts of socialist childhoods and engage in re-writing histories that open space for new knowledges and vast webs of interconnections to emerge. This book will be compelling reading for students and researchers working in education, sociology, and history, particularly those within the interdisciplinary fields of childhood and area studies. The authors of this beautiful book are professional academics and intellectuals who grew up in different socialist countries. Exploring socialist childhoods in myriad ways, they draw on memories and collective history, emotional insider knowledge, and the measured perspective of an analyst. What emerges is life that was caught between real optimism and dullness, ethical commitments and ideological absurdities, selfless devotion to children, and their treatment as a political resource. Such attention to detail and examination of the paradoxical nature of this time makes this collective effort not only timely but remarkably genuine. Alexei Yurchak, University

of California USA *An International Perspective on Economic Education* William B. Walstad, 2012-12-06 Economics is taught in some form in the secondary schools of nations throughout the world The subject is rarely taught in elementary schools and while economics courses are offered in universities the majority of students end their formal education with secondary school Thus the best opportunity for the economic education of the youth of a nation occurs in secondary schools This book examines economic education at this critical level of the educational system The teaching of economics in secondary schools varies across countries These differences occur because of history the structure of education and other national factors At the same time there are common elements in the economic education of many countries especially in content coverage This contrast between the common features and the uniqueness of economic education in secondary schools of major industrial nations exemplifies the international perspective presented in this book The international perspective is developed in the six sections of the volume The first section discusses why nations should include economics in school curricula and presents a framework for teaching economics that should have global appeal Dissension and consensus on economic issues among North American and European economists are examined in the second section The third section surveys the U S research literature on precollege economic education and assesses the current state of economics instruction in U S schools The economics curricula and educational practices in seven other nations the U K Canada Japan Germany Austria Korea and Australia are described in the fourth and fifth sections The fifth section also presents international comparisons of economic understanding based on national testing in six of those nations The sixth and final section explores the role of economic education in centrally planned economies and its effects on the transition to a market economy using Russia Bulgaria and China as case studies **Notes on books** Longmans, Green and co, 1885 Descriptive Catalogue of Books Contained in the Lending Library Bishopsgate Institute, London, 1901 **What is Global Engineering Education For?
