Learning and Instruction in the Digital Age J. Michael Spector, Dirk Ifenthaler, Kinshuk, 2010-03-10 Instruction

tailored to the individual student learning and teaching outside the limits of time and space ideas that were once considered science fiction are now educational reality with the prospect of an intelligent Web 3.0 not far distant. Alongside these innovations exists an emerging set of critical thinking challenges as Internet users create content and learners and teachers take increased responsibility in their work. Learning and Instruction in the Digital Age nimbly balances the technological and pedagogical aspects of these rapid changes gathering papers from noted researchers on a wealth of topics relating to cognitive approaches to learning and teaching, mental models, online learning, communications and innovative educational technologies among them Cognition and student centered Web based learning. The progression of mental models throughout a course of instruction. Experiencing education with 3D virtual worlds. Expanding educational boundaries through multi school collaboration. Adapting e learning to different learning styles. The student blog as reflective diary. With its blend of timely ideas and forward thinking Learning and Instruction in the Digital Age will enrich the work of researchers in educational psychology, educational technology and cognitive science.

Assessment as Learning Zi Yan, Lan Yang, 2021-08-14. Based on a solid theoretical basis of assessment as learning and updated empirical evidences, this timely book significantly expands the existing scope of assessment as learning typically developed in Western contexts. This edited volume updates theoretical and empirical advances in assessment as learning in complex learning processes brought together by an international panel of authors. The contributors provide a wide range of practical ways to harness the power of assessment as learning to make it work more effectively not only in the classroom but also across other achievement related situations e.g. examinations, learning processes before and after classes. Assessment as Learning provides a deep contemporary insight into the field of formative assessment and brings much needed international perspectives to complement the current Western focused research. This is a valuable contribution to the discussion and provides useful insight for researchers in Education.

Introduction to Secondary Teaching Anthony Johnston, 2025-11-13. Drawing from social justice pedagogies, evidence based instruction, the wisdom of experienced teachers and adolescent brain research, Introduction to Secondary Teaching: Blending Wisdom, Research and Social Justice offers theories, practices, rationale and actionable steps needed to be an effective secondary school teacher. Chapters cover building relationships with students, classroom management, creating authentic learning experiences, planning and providing instruction, fostering motivation and engagement in learning and designing meaningful and just assessments. Written to help new teachers enjoy success early on in their careers, this book argues that we cannot wait for teachers to learn from experience alone. This book lays a foundation to help teachers sustain in this challenging profession and become the educational leaders we need. Rooted in this foundation is a new concept, TIPPS, referring to teacher identity, presence, passion and stance, a conceptual framework that informs all aspects of a teacher's work. Teacher educators will appreciate this course friendly text with its guiding questions, real world examples, summarizing key points and features by real teachers.
