Google Maps Price Warranty:

Privacy and Data Protection based on the GDPR Leo Besemer, 2020-09-15 Information about people is becoming increasingly valuable Enabled by new technologies organizations collect and process personal data on a large scale Free flow of data across Europe is vital for the common market but it also presents a clear risk to the fundamental rights of individuals This issue was addressed by the Council of the European Union and the European Parliament with the introduction of the General Data Protection Regulation GDPR For many organizations processing personal data the GDPR came as a shock Not so much its publication in the spring of 2016 but rather the articles that appeared about it in professional journals and newspapers leading to protests and unrest The heavy requirements of the law would cause very expensive measures in companies and organizations was a concern In addition companies which failed to comply would face draconian fines This book is intended to explain where these requirements came from and to prove that the GDPR is not incomprehensible that the principles are indeed remarkably easy to understand It will help anyone in charge of or involved in the processing of personal data to take advantage of the innovative technologies in processing without being unduly hindered by the limitations of the GDPR The many examples and references to EDPB European Data Protection Board publications recent news articles and case law clarify the requirements of the law and make them accessible and understandable Leo's book can provide very effective support to you and your colleagues in reaching this understanding and applying it in practice Fintan Swanton Managing Director of Cygnus Consulting Ltd Ireland

Privacy & Data Protection Essentials Courseware - English Ruben Zeegers, Theo Wanders, 2019-05-15 Besides the Privacy Data Protection Essentials Courseware English ISBN 978 940 180 457 8 publication you are advised to obtain the publication EU GDPR A pocket guide ISBN 978 178 778 064 4 Privacy Data Protection Essentials PDPE covers essential subjects related to the protection of personal data Candidates benefit from a certification that is designed to impart all the required knowledge to help ensure compliancy to the General Data Protection Regulation GDPR This regulation affects every organization that processes European Union personal data Wherever personal data is collected stored used and finally deleted or destroyed privacy concerns arise With the European Union GDPR the Council of the European Union attempts to strengthen and unify data protection for all individuals within the European Union Within the European Union regulations and standards regarding the protection of data are stringent The GDPR came into effect in May 2016 and organizations had until May 2018 to change their policies and processes to ensure that they fully comply with the GDPR Companies outside Europe also need to comply the GDPR when doing business in Europe One of the solutions to comply on the GDPR is to train and qualify staff Certified professionals with the right level of knowledge will help your organization to comply the GDPR The EXIN Privacy Data Protection program covers the required knowledge of legislation and regulations relating to data protection and how this knowledge should be used to be compliant The EXIN Privacy Data Protection Essentials is part of the EXIN qualification program Privacy and Data Protection

Coherence between Data Protection and Competition Law in Digital Markets Klaudia Majcher, 2023-10-09 In digital markets data protection and competition law affect each other in diverse and intricate ways Their entanglement has triggered a global debate on how these two areas of law should interact to effectively address new harms and ensure that the digital economy flourishes *Coherence between Data Protection and Competition Law in Digital Markets* offers a blueprint for bridging the disconnect between data protection and competition law and ensuring a coherent approach towards their enforcement in digital markets Specifically this book focuses on the evolution of data protection and competition law their underlying rationale their key features and common objectives and provides a series of examples to demonstrate how the same empirical phenomena in digital markets pose a common challenge to protecting personal data and promoting market competitiveness A panoply of theoretical and empirical commonalities between these two fields of law as this volume shows are barely mirrored in the legal enforcement policy and institutional approaches in the EU and beyond where the silo approach continues to prevail The ideas that Majcher puts forward for a more synergetic integration of data protection and competition law are anchored in the concept of sectional coherence This new coherence centred paradigm reimagines the interpretation and enforcement of data protection and competition law as mutually cognizant and reciprocal allowing readers to explore in an innovative way the interface between these legal fields and identify positive interactions instead of merely addressing inconsistencies and tensions This book reflects on the conceptual practical institutional and constitutional implications of the transition towards coherence and the relevance of its findings for other jurisdictions

Google and the Mission to Map Meaning and Make Money Bart Milner, 2004 This book is the unfolding story of the new technology of Internet Search how Larry Page and Sergey Brin the founders of Google discovered a new way to index the Internet's network of networks by developing Search methods so powerful that they effectively created a free public and universal library out of billions of random documents It also tells how together with the help of a brilliant team built initially

at Stanford University they then found a new way of making money through contextual advertising now worth e billion leaving potential competitors particularly Microsoft far behind It shows how Google s founders have also succeeded in insisting that integrity rather than profit remains at the heart of an enterprise that they will continue to control despite the best efforts of Wall Street The second half of this book also seeks to explain the central problems of machine intelligence the difference between words and their meaning or syntax and semantics which had blocked this kind of IT development for half a century until Google s founders discovered that hypertext the unique feature of the Internet that links documents could be measured and mapped to sort millions of apparently similar pages for relevance and significance Google s pursuit of a hugely ambitious and optimistic American dream that leaves them globally admired and respected keeping their principles intact whilst also creating a fabulously wealthy company is a winning blend of luck jokes mathematical inspiration engineering perspiration deep technical knowledge of the Internet and they would have you believe thousands of highly trained pigeons The book is 288 pages long including a comprehensive index and 600 item bibliography covering virtually all aspects of Internet Search The print version of the book comes with a free online electronic version with hypertext links to related articles and books designed to make any aspect of the history of Internet search easy to find with a couple of mouse clicks The book s author Bart Milner is a trained technology journalist and editor who started using the Web in 1984 with a 300 baud acoustic coupler and then became a developer partly to try and solve the question of why computer logic has been unable to deal with meaning and association This background has given him an insight into the inspired but almost accidental way that Google s founders cracked the problem of finding a significant document from billions of unindexed and changing Web pages in a fraction of a second Anyone interested in the future of the Internet and Information Technology should enjoy this fast and fluid story of a company which has become a flagship business of the 21st century by not conceding any of its integrity and principles to the huge pressures of commercial profit whilst providing some of the most elegant and powerful engineering solutions ever seen on the Net
