1. What are the four functions of knowledge management and the five dimensions of organizational design and management?

2023-09-12 09:00:44

The four functions of knowledge management are creating, externalizing, combining, and internalizing. The five dimensions of organizational design and management are MCO (creating, externalizing, combining, internalizing and MOPS (benchmarking, modeling, forecasting, backcasting).

Although the concept of a principal-agent relationship between humans and AI is not new, its related emergence carries two potentially significant implications. On the one hand, the prospect of AI agents promises a more convenient and intelligent lifestyle, fostering a sense of hope and anticipation. On the other hand, many organizational employees may feel apprehensive about the rapid rise of AI, as they lack the necessary understanding and skills to effectively harness these new intelligent agents in their workplaces. Comprehending this anxiety is the resulting pressure to implement AI within their work and services, often without fully grasping the underlying mechanisms and consequences.

Considering the ambivalent feelings people have in their organizational affairs towards AI-enhancement and re-orientation this study aims to systematically review two things: (1) how to understand "AI-phobia," and (2) how to enhance "AI-preparedness" by addressing AI-related issues and concerns in organizations. In doing so, this article presents a set of frameworks which can be used as a practical checklist through which organizational capabilities of utilizing AI can be better evaluated and prepared. The next section introduces the major challenges of working with AI in organizations, which will form the basis of the following discussion as how to systematically handle them.

AI-phobia: challenges of working with AI

The challenges that AI pose to humans working in organizations can be categorized into four areas: AI literacy, AI sustainability, AI accountability, and AI implementability. This section will present the meanings of these four AI-phobia and their impacts on organizational preparedness for working with AI, as summarized in Table 1.

AI-literacy

The primary fear people have regarding AI is likely the worst-case of "I don't know how AI works or how to use it." The anxiety stems from ignorance and information asymmetry concerning AI mechanisms and impacts. AI literacy subjects may vary based on organizational stakeholders: for instance, designing AI for AI designers and developers, operating AI for AI application engineers, and using AI for AI end-users. In any case, a common concern is the lack of understanding of AI's workings because of the black box of AI resulting from its multifaceted distributed processes. Even AI designers cannot fully explain why and how AI generates certain products since AI works through a series of steps where data is combined in more intricate than predetermined ways.

This cognitive and accounting AI technology brings great organizational and social impacts. Firstly, the social impact of AI-literacy is "AI-divide." The conventional concept of the "digital divide" represents the gap between digital literate and illiterate individuals. However, while AI is part of digital transformation, people perceive it as something new due to its technological complexity. Therefore, the gap between those with a good understanding of AI and those without it may lead to a new discrepancy and inequality in terms of knowledge capability and utilization of AI.

Secondly, the behavioral or economic impact of AI-literacy is "AI-fabrication." AI-literate individuals have better capabilities to understand and design AI, even without having to disclose it to the AI-illiterate. Information asymmetry between AI-literate and illiterate individuals may provide more chances for AI-literate individuals to be tempted to design and influence AI algorithms to favor certain interests. That is to say in the process of AI-fabrication is the fact that certain people do not know whether and how fabrication has occurred and how to correct it.
