Moral Ground Ethical Action For A Planet In Peril:

Moral Ground Kathleen Dean Moore, Michael P. Nelson, 2011-04-15 Moral Ground brings together the testimony of over eighty visionaries theologians and religious leaders scientists elected officials business leaders naturalists activists and writers to present a diverse and compelling call to honor our individual and collective moral responsibility to our planet In the face of environmental degradation and global climate change scientific knowledge alone does not tell us what we ought to do The missing premise of the argument and much needed center piece in the debate to date has been the need for ethical values moral guidance and principled reasons for doing the right thing for our planet its animals its plants and its people Contributors from throughout the world including North America Africa Australia Asia and Europe bring forth a rich variety of heritages and perspectives Their contributions take many forms illustrating the rich variety of ways we express our moral beliefs in letters poems economic analyses proclamations essays and stories In the end their voices affirm why we must move beyond a scientific study and response to embrace an ongoing model of repair and sustainability These writings demonstrate that scientific analysis and moral conviction can work successfully side by side This is a book that can speak to anyone regardless of his or her worldview and that also includes a section devoted to what next thinking that helps the reader put the words and ideas into action in their personal lives Thanks to generous support from numerous landmark organizations such as the Kendeda Fund and Germeshausen Foundation the book is just the starting point for a national and international discussion that will be carried out in a variety of ways from online debate to town hall meetings from essay competitions for youth to sermons from pulpits in all denominations The Moral Ground movement will result in a newly discovered or rediscovered commitment on a personal and community level to consensus about our ethical obligation to the future Contributors include Fred W Allendorf Bartholomew I Mary Catherine Bateson Thomas Berry Wendell Berry Marcus J Borg J Baird Callicott Courtney S Campbell F Stuart Chapin III Robin Morris Collin Michael M Crow Dalai Lama Alison Hawthorne Deming Brian Doyle David James Duncan Massoumeh Ebtekar Jesse M Fink Dave Foreman Thomas L Friedman James Garvey Thich Nhat Hanh Paul Hawken Bernd Heinrich Linda Hogan bell hooks Dale Jamieson Derrick Jensen John Paul II Martin S Kaplan Angayuqag Oscar Kawagley Stephen R Kellert Robin W Kimmerer Barbara Kingsolver Shepard Krech III Ursula K Le Guin Hank Lentfer Carly Lettero Oren Lyons Wangari Maathai Sallie McFague Bill McKibben Katie McShane Curt Meine Ming Xu N Scott Momaday Kathleen Dean Moore Hylton Murray Philipson Gary Paul Nabhan Seyyed Hossein Nasr Michael P Nelson Barack Obama Ernest Partridge John Perry Edwin P Pister Carl Pope Robert Michael Pyle David Quammen Daniel Quinn Kate Rawles Tri Robinson Libby Roderick Holmes Rolston III Deborah Bird Rose Jonathan F P Rose Carl Safina Scott Russell Sanders Lauret Savoy Nirmal Selvamony Ismail Serageldin Peter Singer Sulak Sivaraksa Gary Snyder James Gustave Speth Brian Swimme Bron Taylor Paul B Thompson George Tinker Joerg Chet Tremmel Quincy Troupe Mary Evelyn Tucker Jos Galizia Tundisi Brian Turner Desmond Tutu Steve Vanderheiden John A Vucetich Kimberly A Wade

KATHLEEN DEAN. MOORE,2020 **Rezension: Kathleen Dean Moore, Michael P. Nelson: Moral Ground. Ethical Action for a Planet in Peril** Franziska Plümmer,2011 Sustainable Heritage Amalia Leifeste,Barry L. Stiefel,2018-06-14
This book brings together ecological conservation theory and heritage preservation theory and shows how these two realms have common purpose Through theoretical discussion and illustrative examples Sustainable Heritage reframes the history of multiple movements within preservation and sustainable design strategies into cross disciplinary themes Through topics such as Cultural Relationships with Nature Ecology Biodiversity Energy and Resource Systems Integrating Biodiversity into the Built Environment Rehabilitation Practice Fixing the Shortcomings Within Community Design Planning and Policy Strategies for Adapting Buildings and Structures for Rising Sea Levels and Vehicles as a Microcosm of Approaching Built Environment Rehabilitation the book explores contemporary ecological and heritage ethics as a strategy for improving the livability of the built environment The authors provide a holistic critique of the challenges we face in light of climate and cultural changes occurring from the local to the global level It synthesizes the best practices offered by separate disciplines as one cohesive way forward toward sustainable design The authors consider strategies for increasing the physical and cultural longevity of the built environment why these two are so closely paired and the potential their overlap offers for sustained and meaningful inhabitation Sustainable Heritage unites students and professionals in a wide range of disciplines with one common language and more closely aligned sets of objectives for preservation and sustainable design **What Can I Do to Help Heal the Environmental Crisis?** Haydn Washington,2019-10-01 The culmination of over three decades of writing by environmental scientist and writer Haydn Washington this book examines the global environmental crisis and its solutions Many of us know that something is wrong with our world that it is wounded At the same time we often don t know why things have gone wrong or what can be done Framing the discussion around three central predicaments the ecological the social and the economic Washington provides background as to why each of these are in crisis and presents steps that individuals can personally take to heal the world Urging the reader to accept the reality of our problems he explores practical solutions for change such as the transition to renewable energy rejection of climate denial and the championing of appropriate technology as well as a readjustment in ethical approaches The book also contains 19 solution boxes by distinguished environmental scholars With a focus on positive personal solutions this book is an essential read for students and scholars of environmental science and environmental philosophy and for all those keen to heal the world and contribute towards a sustainable future *Routledge Handbook of Sustainable Design* Rachel Beth Egenhoefer,2017-07-28 The Routledge Handbook of Sustainable Design considers the design not only of artifacts but of structures systems and interactions that bear our decisions and identities in the context of sustaining our shared planet In addressing issues of design for global impact behavior change systems and strategy ethics and values this handbook presents a unique and powerful design perspective Just as there are multiple

definitions of design so there are several definitions of sustainability making it difficult to find unity The term can sometimes be seen as a goal to achieve or a characteristic to check off on a list of criteria In actuality we will never finish being sustainable We must instead always strive to design work and live sustainably The voices throughout this handbook present many different characteristics layers approaches and perspectives in this journey of sustaining This handbook divides into five sections which together present a holistic approach to understanding the many facets of sustainable design Part 1 Systems and Design Part 2 Global Impact Part 3 Values Ethics and Identity Part 4 Design for Behavior Change Part 5 Moving Forward This handbook will be invaluable to those wishing to broaden their understanding of sustainable design and students and practitioners of Environmental Studies Architecture Product Design and the Visual Arts

Confronting Climate Crises through Education Rebecca L. Young, 2018-10-15 Confronting Climate Crises through Education Reading Our Way Forward envisions the responsibility of public education to engage a citizenry more prepared to address the challenges of a changing world Young advocates a paradigm shift that positions ecopedagogy as the central organizing principle of curriculum and assessment design Each chapter outlines ways literature can serve as a cultural lens for examining the complex patterns of contexts behind our most pressing climate concerns including potential solutions these patterns may illuminate A focus on fiction and non fiction exemplars that can provide such a lens illustrates practical steps educators can take to develop instruction around the immediately relevant environmental crises we are experiencing and to inspire more ecologically conscious globally minded problem solvers prepared to confront them

Teaching Sustainability Wendy Petersen Boring, William Forbes, William Forbes (Professor of geography), 2013 American colleges and universities have been relatively quick to address the challenge of sustainability in operations Ironically they have been slower to respond in regard to their core mission educating students Teaching sustainability aims to redress this shortcoming by opening doors to education for sustainability in the humanities and social sciences The essays in this collection are richly diverse They investigate ways sustainability education pushes back against traditional disciplines while it simultaneously benefits from the perspectives and skills these fields have to offer They also address big questions such as how to make education meaningful how to examine hidden assumptions underlying current curricula and how a focus on sustainability can answer critics of contemporary higher education The heart of teaching sustainability is reflection and advice on pedagogy From these richly diverse case studies important common themes emerge the symbiotic relationship between classroom and campus operations techniques for transforming the campus itself from merely a setting to a learning laboratory and the potential of community partners for teaching sense of place An equally significant theme is the overlap between sustainability education and emerging best practice in pedagogy Essays on theory and practice individual and collaborative projects service learning and consequential activities all exemplify how sustainability and deep learning go hand and hand Like sustainability itself the volume infuses theory with practical application The contributors demonstrate the ways in which a single course can serve as

a powerful change agent for an entire campus how to build bridges between faculty and administrators and even how to move forward on modest budgets The authors themselves constitute a network of advisors Publisher s description

Holdfast Kathleen Dean Moore,2013 Riveting finely crafted essays about family and the natural world and winner of the 2000 Sigurd Olson Nature Writing Award **Landscapes of Hope** Stephen E Strom,2024-10-15 At a time when division polarization and antagonisms pervade the United States here is hope for the future Landscapes of Hope shows how people from all walks of life and backgrounds can come together talk and work out details compromise and do something special for generations to come safeguarding 900 000 acres of spectacular wild country in Utah Perched on the western edge of the Colorado Plateau the Greater San Rafael Swell spans 8 000 square miles in south central Utah and showcases a rich tapestry of landscapes Its colorful geological strata span 350 million years of Earth s history and contain a remarkably well preserved fossil record from times when primitive marine species first emerged to the era of dinosaurs and the appearance of large mammals The region s arid climate and isolation have also worked together to preserve cultural artifacts left by Indigenous peoples who occupied the area for more than ten millennia As the treasures of the Greater San Rafael Swell became widely known during the 1960s conservationists undertook campaigns to designate large tracts of public lands in the region as wilderness where the earth and its community of life are untrammelled by man where man himself is a visitor who does not remain Initially some residents of Emery County located at the heart of the Greater Swell strongly opposed these efforts concerned that wilderness designations could limit ranching and mining undermine residents livelihoods and sever their cultural ties to the lands At first reconciling these opposing views seemed impossible but starting in the late 1990s Emery County leaders and residents engaged a wide spectrum of stakeholders in discussions spanning more than two decades In 2019 their efforts to find common ground culminated in the passage of the John D Dingell Jr Conservation Management and Recreation Act This comprehensive federal legislation designated substantial portions of public lands for multiple uses while creating twenty five new wilderness and other protected areas safeguarding nearly 900 000 acres Landscapes of Hope celebrates the commitment of those who take rightful pride in their legacy and who forged the legislation conserving landscapes of extraordinary beauty and profound cultural importance The fruits of their endeavors are portrayed in photographs and stories that showcase the sublime grandeur of the areas now protected in perpetuity **The Philosopher's Index** ,1994 Vols for 1969 include a section of abstracts [Educational Film/video Locator of the Consortium of University Film Centers](#) and R.R. Bowker Consortium of University Film Centers,1986 **Congressional**

Record United States. Congress, 1989 **Planet in Peril** Dale Westphal, Fred Westphal, 1994 Designed for courses in environmental ethics this reader is also an attractive supplement to contemporary moral issues or any applied ethics courses It features readings in environmental ethics including Paul Taylor s seminal essay The Ethics of Respect for Nature and Works by Vice President Al Gore Jr and J Baird Callicott **The Ethics of Climate Change** James Garvey, 2008-01-21 Open this book and James Garvey is right there making real sense to you in a necessary conversation capturing you to the very end Ted Honderich Grote Professor Emeritus of The Philosophy of Mind Logic University College London UK James Garvey argues that the ultimate rationale for action on climate change cannot be simply economic political scientific or social though our decisions should be informed by such things Instead climate change is largely a moral problem What we should do about it depends on what matters to us and what we think is right This book is an introduction to the ethics of climate change It considers a little climate science and a lot of moral philosophy ultimately finding a way into the many possible positions associated with climate change It is also a call for action for doing something about the moral demands placed on both governments and individuals by the fact of climate change This is a book about choices responsibility and where the moral weight falls on our warming world **A Perfect Moral Storm** Stephen Mark Gardiner, Stephen M. Gardiner, 2013-03-21 Climate change is genuinely global dominantly intergenerational and takes place in a setting where our prescriptive theories are weak This perfect moral storm poses a profound challenge to humanity This book explains the storm how it makes sense of our current malaise and why better ethics can help This book argues that despite decades of awareness we are currently accelerating hard into the climate problem in a way that defies standard explanations It claims that this suggests that our current focus on the scientific and economic questions is too narrow and that the tendency to see the political problem as a traditional tragedy of the commons facing nation states is too optimistic Instead the key issue is that the current generation and especially the most affluent are in a position to pass on most of the costs of their behavior and especially the most serious harms to the global poor future generations and nonhuman nature This tyranny of the contemporary is a deeper problem than the traditional tragedy of the commons Moreover the book argues that this diagnosis helps to explain both the past failures of international climate policy e g the shadow solutions of Kyoto and Copenhagen and the current push towards geoengineering Part of the solution it argues is better public ethics We must work harder on articulating both the ethical problem and moral constraints on solutions In addition there is a role for defensive moral and political philosophy aimed at preserving the quality of public discourse ***Great Tide Rising*** Kathleen Dean Moore, 2016-02-01 Even as seas rise against the shores another great tide is beginning to rise a tide of outrage against the pillage of the planet a tide of commitment to justice and human rights a swelling affirmation of moral responsibility to the future and to Earth s fullness of life Philosopher and nature essayist Kathleen Dean Moore takes on the essential questions Why is it wrong to wreck the world What is our obligation to the future What is the transformative power of moral resolve How can clear thinking stand against the lies and

illogic that batter the chances for positive change What are useful answers to the recurring questions of a storm threatened time What can anyone do Is there any hope And always this What stories and ideas will lift people who deeply care inspiring them to move forward with clarity and moral courage **Faith of Cranes** Hank Lentfer, 2011 Faith of Cranes weaves together three parallel narratives the plight and beauty of sandhill cranes one man's effort to recover hope amid destructive climate change and the birth of a daughter Faith of Cranes is a love song to the beauty and worth of the lives we are able to lead in the world just as it is troubled though it be Lentfer's storytelling achieves its joys and universality not via grand summations but via grounded self giving familial intimacy funny friendships attentive griefs and full bodied immersion in the Alaskan rainforest The writing is honest intensely lived and overflowing with heart broken mended and whole David James Duncan author of The Brothers K and God Laughs Plays Hank Lentfer listened to cranes passing over his home in southeast Alaska for twenty years before bothering to figure out where they were going On a very visceral level he didn't want to know After all cranes gliding through the wide skies of Alaska are the essence of wildness But the same animals pecking a living between the cornfields and condos of California's Central Valley seem trapped and diminished A former wildlife biologist and longtime conservationist Lentfer had come to accept that no number of letters to the editor or trips to D C could stop the spread of clear cuts alter the course of climate change or ensure that his beloved cranes would always appear And he had no idea that following the paths of cranes would lead him to the very things he was most afraid of parenthood responsibility and actions of hope in a frustrating and warming world Faith of Cranes is Lentfer's quiet lyrical memoir of his home and community near Glacier Bay that reveals a family's simple acts planting potatoes watching cranes hunting deer as well as a close and eccentric Alaskan community It shows how several thousand birds and one little girl teach a new father there is no future imaginable that does not leave room for compassion and grace **Ethics for a Small Planet** Daniel C.

Maguire, Larry L. Rasmussen, 1998-01-22 This book offers an original assessment of the crisis caused by the combined impact of overpopulation overconsumption and economic and political injustice It summons religious scholarship into urgent dialogue with the other disciplines and with the world's policymakers The authors seek a new understanding of religion and its power since for good or for ill the world's religions will be players in the crises relating to population and the threat of ecocide Two thirds of the world's people affiliate with these religions and the other third cannot escape the influence of these symbol filled cultural powerhouses Ethics for a Small Planet offers complementary studies by two major social ethicists on these issues Daniel C Maguire indicts our male dominated religions for the problems they have caused for our ecology and reproductive ethics He raises the controversial questions of whether the very concept of God is a problem and whether Christianity's notions of afterlife and a divinized male have done more harm than good Larry L Rasmussen also recognizes that the problems of our planet are largely male made and rich dominated He writes that Europeans packaged a form of earth unfriendly capitalism and shipped it all over the world with missionary zeal He ably scans the long history that led to

the current manic rush to push the earth beyond its limits and goes on to suggest moral norms and policy guidelines for sustainable communities and genuinely shared power Both authors argue that there are positive and renewable moral energies in the world's religions and that unless religion understood as a response to the sanctity of life animates our ethical debates the prospects for the world are grim The sense of the sacred is presented here as the nucleus of the good and the only force that can bring about the lifestyle changes and power reallocations that are necessary to prevent terracide
