**Moral Panics in the Contemporary World** Julian Petley, Chas Critcher, Jason Hughes, Amanda Rohloff, 2013-06-18  
Moral Panics in the Contemporary World represents the best current theoretical and empirical work on the topic taken from the international conference on moral panics held at Brunel University. The range of contributors from established scholars to emerging ones in the field and from a working journalist as well helps to cover a wide range of moral panics both old and new and extend the geographical scope of moral panic analysis to previously underrepresented areas. Designed from the outset to comprise a coherent and integrated set of viewpoints which share a common engagement with critically exploring moral panics in the contemporary world it contains case studies instantly recognisable and familiar to a student readership: drugs, alcohol, sexual abuse and racism. The collection brings a fresh approach to analysis and argument by testing and extending the concept of moral panic and analyzing a range of topics and geographical contexts accurately reflecting the state of the art moral panics research today. *Moral Panics in the Contemporary World* C. Critcher, Jason Hughes, Julian Petley, Amanda Rohloff, 2013. Moral Panics in the Contemporary World represents the best current theoretical and empirical work on the topic taken from the international conference on moral panics held at Brunel University. The range of contributors from established scholars to emerging ones in the field and from a working journalist as well helps to cover a wide range of moral panics both old and new and extend the geographical scope of moral panic analysis to previously underrepresented areas. Designed from the outset to comprise a coherent and integrated set of viewpoints which share a common engagement with critically exploring moral panics in the contemporary world it contains case studies instantly recognisable and familiar to a student readership: drugs, alcohol, sexual abuse and racism. The collection brings a fresh approach to analysis and argument by testing and extending the concept of moral panic and analyzing a range of topics and geographical contexts accurately reflecting the state of the art moral panics research today. *Crime media culture* Amanda Rohloff, 2011. *Moral Panics and School Educational Policy* Grant Rodwell, 2017-07-06. How do the moral panics that have plagued school education since its nineteenth century beginnings impact current school education policy? Research has shown young people to be particularly vulnerable to moral panics and with the rise of social media the impact of moral panics on school education is growing exponentially. Increasingly they are reaching into the highest levels of national governments.

and so powerful are their effects some politicians choose to orchestrate them for their own political ends For many educational administrators the management of the fallout of moral panics has become a time consuming part of their day as well as being a problematic time for parents teachers and students First developed by British and Canadian sociologists such as Stanley Cohen 1972 moral panic theory has evolved substantially since its early focus on adolescent deviant behaviour and is now a part of common media talk This book addresses the need for a single monograph on the topic with reference to historical moral panics such as those associated with sexuality education but also wider societal moral panics such as those associated with obesity Teachers students indeed all members of school communities along with educational administrators and politicians can learn from this study of the impact of moral panics on school educational policy

**Climate Change, Moral Panics and Civilization** Amanda Rohloff, 2018-07-17 In recent years interest in climate change has rapidly increased in the social sciences and yet there is still relatively little published material in the field that seeks to understand the development of climate change as a perceived social problem This book contributes to filling this gap by theoretically linking the study of the historical development of social perceptions about nature and climate change with the figurational sociology of Norbert Elias and the study of moral panics By focusing sociological theory on climate change this book situates the issue within the broader context of the development of ecological civilizing processes and comes to conceive of contemporary campaigns surrounding climate change as instances of moral panics civilizing offensives with both civilizing and decivilizing effects In the process the author not only proposes a new approach to moral panics research but makes a fundamental contribution to the development of figurational sociology and the understanding of how climate change has developed as a social problem with significant implications regarding how to improve the efficacy of climate change campaigns This highly innovative study should be of interest to students and researchers working in the fields of sociology environment and sustainability media studies and political science
