E. Booij, 2005 Table of contents Beyond Morphology Peter Ackema, Ad Neeleman, 2004-10-07 The phenomena discussed by the authors range from synthetic compounding in English to agreement alternations in Arabic and complementizer agreement in dialects of Dutch Their exposition combines insights from lexicalism and distributed morphology and is expressed in terms accessible to scholars and advanced students unique exploration of interfaces of morphology with syntax and phonology wide empirical scope with many new observations theoretically innovative and important accessible to students with chapters designed for use in teaching *Morphology's place in the grammar* Silvia Alpers, 2005-10-11 Seminar paper from the year 2004 in the subject English Language and Literature Studies Linguistics grade 2.5 University of Göttingen Seminar für Englische Philologie course Morphology its relation to syntax language English abstract There is much discussion in morphological theory as to where exactly morphology belongs in the mental representation of grammar Several grammar models have been developed each aiming at describing the key concepts of our grammar and the position of morphology in particular Traditionally there seems to have been a general consensus that there exists pre syntactic lexical and post syntactic components but recently this has become an issue of debate A key issue in this discussion is the process of word formation While some linguists argue that word formation takes place in a separate morphological component some say syntactic rules also play a part and some argue that words actually are formed in the syntax Numerous linguists have contributed to this discussion many proposing new models of morphology and word formation In this paper two alternate theories that attempt at describing the position of morphology in the grammar will be outlined Chapter 2 describes Halle and Marantz 1993 model

of Distributed Morphology which presupposes that all word formation takes place in a syntactic module and that there is no such thing as a lexical process Chapters 3 and 4 give an outline of an alternate view to Distributed Morphology Chapter 3 describes Booij's 1993 approach at proving that there are two different types of inflection and that contrary to former theories inflection can feed word formation In chapter 4 Haspelmath 1995 provides much the same view as Booij by showing that inflection also can contribute to changing a word's part of speech category
