Morphosis ,1993 **Visioning Technologies** Graham Cairns,2016-12-08 Visioning Technologies brings together a collection of texts from leading theorists to examine how architecture has been and is reframed and restructured by the visual and theoretical frameworks introduced by different technologies of sight understood to include orthographic projection perspective drawing telescopic devices photography film and computer visualization amongst others Each chapter deals with its own area and historical period of expertise organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today This book underlines the way in which architectural forms and design processes have developed historically in conjunction with the systems of sight we manufacture technologically and suggests this continues today Paradoxically it is premised on the argument that these technological systems tend in their initial formulations to obtain ever greater realism in our visualizations of the physical world *Postmodern Medievalisms* Richard J. Lebbeus Woods. Experimental architecture Massimo Mucci,2022-03-25 Nell ampia produzione dell'architetto americano Lebbeus Woods 1940 2012 alcuni progetti risalenti alla prima metà degli anni Novanta del secolo scorso sono particolarmente rappresentativi del suo impegno nel ridefinire il ruolo politico dell'architettura nei processi di trasformazione della società I tre progetti per le città di Zagabria Sarajevo e L'Avana si distinguono per la ricerca originale e innovativa svolta dall'architetto su concetti quali freespace free zone heterarchical city fino ad arrivare a temi progettuali di più ampia portata Lo studio di questi progetti attraverso l'uso della rappresentazione dell'architettura come strumento di

analisi compositiva permette di addentrarsi nelle procedure ideative e grafiche del progettista e di chiarire i punti di contatto e le distanze rispetto alle tendenze architettoniche di quegli anni. I lavori grafici sono qui considerati espressioni di un pensiero teorico critico sull'architettura elaborato attraverso l'uso esplorativo simultaneo del disegno e della scrittura intrecciati tra loro su più livelli semantici in una catena di invenzioni figurative. Questo permette di riconoscere nell'opera di Woods l'uso del disegno come progetto e di capire aspetti non conosciuti del suo linguaggio architettonico approfondendone la genesi compositiva all'interno di un quadro culturale caratterizzato da temi a lui vicini come quello della experimental architecture, il Deco, struttivismo, la trasformazione.
