Multi Objective Decision Analysis Managing Trade Offs And Uncertainty Quantitative Approaches To Decision Making:

Multi-objective Decision Analysis Clinton W. Brownley, 2013-03-28 Whether managing strategy operations or products knowing how to make the best decision in a complex uncertain business environment is difficult You might be faced with multiple competing objectives which means making trade offs To complicate matters any uncertainty makes it hard to explicitly understand how different objectives will impact potential outcomes This book will help you face these problems It provides a decision analysis framework implemented as a simple spreadsheet tool This multi objective decision analysis framework helps you to measure trade offs among objectives and incorporate uncertainties and risk preferences With this book you will be able to identify what information is needed to make a decision define how that information should be combined and finally provide quantifiable evidence to clearly communicate and justify the decision The process involves minimal overhead and is perfect for busy professionals who need a simple structured process for making tracking and communicating decisions This process makes decision making more efficient by focusing only on information and factors that are well defined measureable and relevant to the decision at hand The framework requires clear characterization of a decision ensuring that it can be traced and is consistent with the intended objectives and organizational values Using this structured decision making framework anyone can consistently make better decisions to gain competitive and strategic advantage

Technologies: Concepts, Methodologies, Tools and Applications Management Association, Information Resources,2011-03-31 Green Technologies Concepts Methodologies Tools and Applications assembles the most up to date collection of research results and recent discoveries in environmental and green technology This comprehensive anthology covers a wide range of topics i Statistical Methods for Adaptive Management Studies Vera Sit,Brenda Taylor,British Columbia. Ministry of Forests. Research Branch,1998 Adaptive management is a hybrid of scientific research and resource management blending methods of investigation and discovery with deliberate manipulations of managed systems This handbook discusses key aspects of statistics in adaptive management beginning with a working definition a demonstration of the value of adaptive management to forestry issues and an explanation of some of the differences between research studies and adaptive management techniques Topics of subsequent chapters include the design of experiments studies of uncontrolled events retrospective studies making measurements and estimates errors of inference Bayesian statistical methods decision analysis to take uncertainties into account in forest resource management and selection of the appropriate statistical methods and asking the right questions Includes glossary *Risk/Benefit Analysis in Water Resources Planning and Management* Yacov Haimes,2013-06-29 Ronald M North President Universities Council on Water Resources People sense intuitively that the world in which we live is not free of risk Every decision every action even the refusal to either act or decide involves some element of risk Perhaps because we accept relatively low levels of risk in our daily activities we tend to minimize the existence of risk and thereby fail to include risk assessment in those decisions and actions which could be improved through a risk assessment process However our casual approach to risk assessment seems to stem largely from the difficulties inherent in measuring risk rather than from any lack of cognizance of the existence of risk This conclusion is evidenced by the many statements in official documents relating to planning and evaluation which suggest that risk assessments should be conducted but do not provide the mechanism for such assessments nor do they encourage their consideration in the decision making process This conference on Risk Benefit Analysis in Water Resources Planning and Management is notable because it attempts to identify and evaluate the mechanisms available for risk assessment which might be useful in water resources planning and management efforts These proceedings bring together the thoughts of professional persons who have struggled with the problems of risk assessment and who have contributed to the refinement of both theoretical and pragmatic solutions for the improvement of risk assessment processes *Handbook of Research on Hydroinformatics: Technologies, Theories and Applications* Gasmelseid, Tagelsir Mohamed,2010-07-31 This book provides relevant theoretical frameworks and empirical research findings in the area hydroinformatics to assist professionals to
