Fabregat, 2016-04-19 Metaheuristics are widely used to solve important practical combinatorial optimization problems. Many new multicast applications emerging from the Internet such as TV over the Internet, radio over the Internet, and multipoint video streaming require reduced bandwidth consumption, end-to-end delay, and packet loss ratio. It is necessary to design an

Gandibleux, Marc Sevaux, Kenneth Sörensen, Vincent T'Kindt, 2012-08-27 The success of metaheuristics on hard single objective optimization problems is well recognized today. However, many real life problems require taking into account several conflicting points of view corresponding to multiple objectives. The use of metaheuristic optimization techniques for multi objective problems is the subject of this volume. The book includes selected surveys, tutorials, and state of the art research papers in this field which were first presented at a free workshop jointly organized by the French working group on Multi objective Mathematical Programming PM2O and the EURO working group on Metaheuristics in December 2002. It is the first book which considers both various metaheuristics and various kind of problems e.g. combinatorial problems, real situations, non linear problems applied to multiple objective optimization. Metaheuristics used include genetic algorithms and colony optimization, simulated annealing, scatter search, etc. Problems concern timetabling, vehicle routing, and more. Methodological aspects such as quality evaluation are also covered. *Advances in Multi-Objective Nature Inspired*

Computing Carlos Coello Coello, Clarisse Dhaenens, Laetitia Jourdan, 2010-02-04 The purpose of this book is to collect contributions that deal with the use of nature inspired metaheuristics for solving multi objective combinatorial optimization problems. Such a collection intends to provide an overview of the state of the art developments in this field with the aim of motivating more researchers in operations research, engineering, and computer science to do research in this area. As such, this book is expected to become a valuable reference for those wishing to do research on the use of nature inspired metaheuristics for solving multi objective combinatorial optimization problems. **Multi-Objective Optimization Using**
