Multicriteria Design R.B. Statnikov, 2013-03-09 This book is devoted to the PSI method Its appearance was a reaction to the unsatisfactory situation in applications of optimization methods in engineering After comprehensive testing of the PSI method in various fields of machine engineering it has become obvious that this method substantially surpasses all other available techniques in many respects It has now become known that the PSI method is successfully used not only in machine design at which it was initially aimed but also in polymer chemistry pharmacy nuclear energy biology geophysics and many other fields of human activity To all appearances this method has become so popular for its potential of taking into account the specific features of applied optimization better than other methods being at the same time comparatively simple and friendly and because unlike traditional optimization methods which are intended only for searching for optimal solutions the PSI method is also aimed at correctly formulating engineering optimization problems One well known aircraft designer once said To solve an optimization problem in engineering means first of all to be able to state this problem properly In this sense the PSI method has no competitors Although this method has been presented in Russia in numerous papers and books Western readers have had the opportunity to familiarize themselves with this method only recently Ozernoy 1988 Lieberman 1991 Stadler and Dauer 1992 Dyer Fishburn Steuer Wallenius and Zionts 1992 Steuer and Sun 1995 etc **Multicriteria**

Decision Aid Classification Methods Michael Doumpos, Constantin Zopounidis, 2006-04-18 The book discusses a new approach to the classification problem following the decision support orientation of multicriteria decision aid The book reviews the existing research on the development of classification methods investigating the corresponding model

development procedures and providing a thorough analysis of their performance both in experimental situations and real world problems from the field of finance Audience Researchers and professionals working in management science decision analysis operations research financial banking analysis economics statistics computer science as well as graduate students in management science and operations research

Intelligent Decision Aiding Systems Based on Multiple Criteria for Financial Engineering Constantin Zopounidis, Michael Doumpos, 2013-11-27 This book provides a new point of view on the field of financial engineering through the application of multicriteria intelligent decision aiding systems The aim of the book is to provide a review of the research in the area and to explore the adequacy of the tools and systems developed according to this innovative approach in addressing complex financial decision problems encountered within the field of financial engineering Audience Researchers and professionals such as financial managers financial engineers investors operations research specialists computer scientists management scientists and economists

Trends in Industrial and Applied Mathematics Abul Hasan Siddiqi, M. Kocvara, 2013-12-01 An important objective of the study of mathematics is to analyze and visualize phenomena of nature and real world problems for its proper understanding Gradually it is also becoming the language of modern financial instruments To project some of these developments the conference was planned under the joint auspices of the Indian Society of Industrial and Applied mathematics ISIAM and Guru Nanak Dev University G N D U Amritsar India Dr Pammy Manchanda chairperson of Mathematics Department G N D U was appointed the organizing secretary and an organizing committee was constituted The Conference was scheduled in World Mathematics Year 2000 but due one reason or the other it could be held during 22-25 January 2001 However keeping in view the suggestion of the International Mathematics union we organized two symposia Role of Mathematics in industrial development and vice versa and How image of Mathematics can be improved in public These two symposia aroused great interest among the participants and almost everyone participated in the deliberations The discussion in these two themes could be summarized in the lengthy following lines Tradition of working in isolation is a barrier for interaction with the workers in the other fields of science and engineering what to talk of non academic areas specially the private sector of finance and industry Therefore it is essential to build bridges within institutions and between institutions

Topics in Industrial Mathematics H. Neunzert, Abul Hasan Siddiqi, 2000-10-31 This book is devoted to some analytical and numerical methods for analyzing industrial problems related to emerging technologies such as digital image processing material sciences and financial derivatives affecting banking and financial institutions Case studies are based on industrial projects given by reputable industrial organizations of Europe to the Institute of Industrial and Business Mathematics Kaiserslautern Germany Mathematical methods presented in the book which are most reliable for understanding current industrial problems include Iterative Optimization Algorithms Galerkin's Method Finite Element Method Boundary Element Method Quasi Monte Carlo Method Wavelet Analysis and Fractal Analysis The Black Scholes model of Option Pricing which was awarded the 1997 Nobel Prize in Economics is presented in the book In

addition basic concepts related to modeling are incorporated in the book Audience The book is appropriate for a course in Industrial Mathematics for upper level undergraduate or beginning graduate level students of mathematics or any branch of engineering
