Kapstein, Joshua W. Busby, 2013-08-29 Drawing on a rich set of interviews and surveys this book shows how the global AIDS treatment advocacy movement helped millions in the developing world gain access to life saving medication The movement achieved this by transforming the market for AIDS drugs from one which was

low volume high price to one based on access for all The authors suggest that a movement's ability to transform markets depends upon whether 1 markets are contestable 2 they have framed their arguments to resonate across their target audiences 3 the movement itself has a coherent goal 4 the costs are low or the benefit to cost ratio is favourable and finally 5 institutions are present to reward continued achievement of the new market principle These insights are applied to a range of other cases including malaria maternal mortality water diarrheal disease non communicable diseases education climate change the ivory trade sex trafficking and the Atlantic slave trade

International Politics of HIV/AIDS Hakan Seckinelgin, 2007-08-07 This book examines the global governance of the HIV AIDS epidemic interrogating the role of this international system and global discourse on HIV AIDS interventions The geographical focus is Sub Saharan Africa since the region has been at the forefront of these interventions There is a need to understand the relationship between the international political environment and the impact of resulting policies on HIV AIDS in the context of people's lives Hakan Seckinelgin points out a certain disjuncture between this governance structures and the way people experience the disease in their everyday lives Although the structure allows people to emerge as policy relevant target groups and beneficiaries the articulation of needs and design of policy interventions tends to reflect international priorities rather than people's thinking on the problem In other words he argues that while the international interventions highlight the importance attributed to the HIV AIDS problem the nature of the system does not allow interventions to be far reaching and sustainable Offering a critical contribution to the understanding of the problems in HIV AIDS in Sub Saharan Africa *International Politics of HIV AIDS* will be invaluable to students and researchers of health international politics and development

Gender, Global Health, and Violence Tiina Vaittinen, Catia C. Confortini, 2019-11-21 Beyond the metaphorical use of healthy society as a normative goal of Peace Research there is little engagement in contemporary Peace Research with questions of global health Simultaneously critical feminist approaches to the intersections of different forms of violence and health are rare in Global Health literature Bringing together feminist Peace Research and Global Health scholarships this edited book aims to enrich both scholarly traditions On the one hand the book provides perspectives from feminist Peace Research that help us to understand and analyse different forms of violence in the gendered realm of global health On the other hand the variety of empirical cases analysed in the chapters widens the horizons of Peace Research in its understanding of what it means to study violence peace and justice in everyday lives The themes dealt in the chapters of the book vary from questions of reproductive health to non communicable e.g breast cancer and communicable diseases e.g HIV AIDS war time sexual violence mental health therapeutic justice domestic violence and ageing and dementia This text will help students and researchers alike navigate Global Health through a feminist lens

Singing For Life Gregory Barz, 2014-06-17 Efforts within the past decade to address the HIV AIDS pandemic in sub Saharan Africa have dealt with HIV AIDS principally as a medical concern despite the fact that doctors continue to be confronted with the complex relationship of the disease to broader social issues When medical and governmental institutions fail artists step in
