Behavioral Decision Analysis Florian M. Federspiel,Gilberto Montibeller,Matthias Seifert,2024-05-30 This book lays out a foundation and taxonomy for Behavioral Decision Analysis featuring representative work across various domains Traditional research in the domain of Decision Analysis has focused on the design and application of logically consistent tools

to support decision makers during the process of structuring problem complexity modeling uncertainty generating predictions eliciting preferences and ultimately making better decisions Two commonly held assumptions are that the decision maker's cognitive belief system is fully accessible and that this system can be understood and formalized by trained analysts However in past years an active line of research has emerged studying instances in which such assumptions may not hold This book unites this community under the common theme of Behavioral Decision Analysis The taxonomy used in this book categorizes research based on task focus prediction or decision and behavioral level individual or group Two theoretical lenses that lie at the interface between 1 normative and descriptive research and 2 normative and prescriptive research are introduced The book then proceeds to highlight representative works across the two lenses focused on individual and group level decision making Featuring various methodologies and applications the book serves as a reference for researchers students and professionals across different disciplines with a common interest in Behavioral Decision Analysis

Developing Nations and Super-optimum Policy Analysis Stuart S. Nagel, Miriam K. Mills, 1993

The key purpose of this book is to apply decision aiding software and super optimum solutions to the public policy problems of developing nations. Decision aiding software refers to microcomputer programs that can process a set of societal goals to be achieved, public policy alternatives for achieving them, and relations between goals and alternatives. Super optimum solutions refer to policy alternatives that enable liberals, conservatives or other major viewpoints to exceed their initial best expectations simultaneously. This approach can be applied to policy problems that relate on a general level to technology, economics, sociology and political science. This approach is also applicable to more specific policy problems that relate to labor, management, relations, transportation, agriculture, education, employment and defense.

Multi-Criteria Decision Analysis Igor Linkov, Emily Moberg, 2017-03-29 Environmental management is often complicated and multidisciplinary and the issues that arise can be difficult to solve analytically Often decision makers take ad hoc approaches which may result in the ignoring of important stakeholder opinions or decision criteria Multi criteria decision analysis MCDA provides a framework by which these types of decisions can be made but despite being used effectively in many fields it is not often used in environmental management Given the novelty and inherent applicability of this decision making framework to the environmental field there is a need for more teaching tools for MCDA In particular there is a need for a case study based approach to help readers navigate the many MCDA methods and decide how to apply them to a specific case Through a collection of case studies Multi Criteria Decision Analysis Environmental Applications and Case Studies gives readers the tools to apply cutting edge MCDA methods to their own environmental projects It offers an overview of the types of MCDA available and a conceptual framework of how it is applied with the focus on its applicability for environmental science Taking an in depth look at the case of sediment management the book introduces different steps of MCDA processes from problem formulation and model development to criteria weighing and alternative scoring The authors then explore the case using various MCDA methods which allows readers to see clearly how the methodologies differ and gain a better understanding of the mechanistic operation of the analysis A series of case studies in nanotechnology collectively demonstrate the application of MCDA in situations of high variability and uncertainty that require the integration of technical information and expert judgment an area where MCDA clearly shines The authors describe multiple decisions from risk classification to value of information analysis to the assessment of potential research and funding investments that readers may face in dealing with emerging environmental threats Demonstrating the broad applicability of MCDA methods for different types of cases the

book presents a series of case studies ranging from oyster restoration to oil spill response In conjunction with these cases the book also provides corresponding decision models that are implemented by the DECERNS software and allow users to examine the same case using multiple MCDA tools The DECERNS software and models are available for download at www.crcpress.com Intended both as a research and teaching tool this book inspires creative thinking when applying MCDA to complicated environmental issues EAF Toolbox Marcelo Vasconcellos,Claire Attwood,2012 The EAF Toolbox has been designed to guide users through each of the four main EAF management planning steps and activities using simplified text and clear instructions The toolbox also helps users decide which tool s could be most appropriate for each step given the type of fishery their resources and capacity Website summary **The Potential of Spatial Planning Tools to Support the Ecosystem Approach to Aquaculture** José Aguilar-Manjarrez,James M.
