World Health and Disease P. R. Payne, 2001-04 This book presents a global view of human health It traces some of the major changes in the health and disease patterns affecting humankind and sets these in the context of demographic change and economic development The book addresses a series of important questions How and why have patterns of health and disease changed so dramatically in industrialized countries over the last century And why within a relatively wealthy country such as the United Kingdom is there so much variation in health between women and men married and single people from different ethnic groups manual and non manual workers What is the evidence supporting competing explanations for the health divide between groups with the best and the worst health experience Globally how are the health problems confronting the populations of developing countries different from those of the developed world where has progress been achieved and where are past gains being undermined Does rapid population growth testify to health improvements but does it also threaten them To examine these questions the authors of this book have drawn together arguments and evidence from a wide range of disciplines in particular demography economics nutrition history biology and epidemiology The book also considers ways in which evidence and in particular statistical data can be used or abused Over 120 tables and figures illustrate and augment the text Two detailed case studies on Bangladesh and on the relationship between food health and disease explore the themes of the book in depth

Health and Healing in Comparative Perspective Elizabeth Dixon Whitaker, 2006 This reader provides both fascinating comparative ethnographic detail and a theoretical framework for organizing and interpreting information about health While there are many health related fields represented in this book its core discipline is medical anthropology and its main focus is the comparative approach Cross cultural comparison gives anthropological analysis breadth while the evolutionary time scale gives it depth These two features have always been fundamental to anthropology and continue to distinguish it among the social sciences A third feature is the in depth knowledge of culture produced by anthropological methods such as participant observation involving long term presence in and research among a study population The first part of the book explores healing systems in

different cultures the second and third provide a strong grounding in evolutionary and culture oriented analysis making clear the connections between biology and culture as they affect health the final part emphasizes case studies that apply the theoretical principles presented earlier to particular health topics For medical anthropology medical sociology public health nursing and medical training professionals **Bioterrorism** Anthony S.
