1. Attach the Barrel Extension:

After removing the Scare-Away from the shipping box, attach the barrel extension (#54) to the barrel of the combustion chamber (#83).

Ensure that the weep hole faces the ground:

Ensure that the welded section on the seam of the barrel extension is facing **down**, so that any water will drain from the weep hole just above it.

Tighten the three bolts (#56) with a 13 mm wrench.

Important:

These three bolts (#56) must be tight, or explosion pressure will damage the bolt connections on the combustion chamber (#83).

2. Connect Scare-Away to LP Gas:

With a full tank of LP gas, open the valve and allow a small amount of LP gas to escape; close the valve at once.

Connect the pressure reducing valve (#710) to the LP gas tank with the bull nose connector (#103).

Ensure that the side with the label faces down, so that any water will drain from the weep hole.

Tighten nut (#107) with a wrench.
