An Audience of One Srinivas Rao,2018-08-07 The creator of the Unmistakable Creative podcast makes a counterintuitive argument By focusing your creative work on pleasing yourself you can increase your productivity happiness and eventually paradoxically the size of your audience Creating for your own pleasure whether you re writing a novel composing songs or painting a landscape can seem pointless It s tempting to focus on pursuing money and fame rather than the process itself But as Srini Rao warns creating then turns into a chore that can harm your self esteem and suck the pleasure out of life rather than being a source of joy Rao host of the podcast The Unmistakable Creative argues that we should counter this thinking by intentionally creating art for ourselves alone an audience of one In this book he shares the fascinating true stories of creatives who took this path along with actionable tips and the research of creativity experts You ll learn for example How

Oprah's intentional focus on her own work rather than the opinions of everyone else catapulted her into one of the most popular talk shows of all time. How being process driven can not only help you produce more work but can make you happier outside of your creative time. How to put together a creative team of rivals whose feedback can help you hone your craft and filter out useless feedback. By playing to an audience of one we can find more happiness, increased productivity and a greater sense of community.

Your Happiness Was Hacked Vivek Wadhwa, Alex Salkever, 2018-06-26 Wadhwa and Salkever have written a great book to help us understand our addiction to technology and suggest what we can do about it. Andre Oppenheimer, columnist for the Miami Herald, joint winner of the 1987 Pulitzer Prize. Technology, your master or your friend? Do you feel ruled by your smartphone and enslaved by your email or social network activities? Digital technology is making us miserable, say bestselling authors and former tech executives Vivek Wadhwa and Alex Salkever. We've become a tribe of tech addicts and it's not entirely our fault. Taking advantage of vulnerabilities in human brain function, tech companies entice us to overdose on technology interaction. This damages our lives, work, families and friendships. Swipe-driven dating apps train us to evaluate people like products, diminishing our relationships. At work, we email on average seventy-seven times a day, ruining our concentration. At home, light from our screens is contributing to epidemic sleep deprivation. But we can reclaim our lives without dismissing technology. The authors explain how to avoid getting hooked on tech and how to define and control the roles that tech is playing and could play in our lives. And they provide a guide to technological and personal tools for regaining control. This readable book turns personal observation into a handy action guide to adapting to our new reality of omnipresent technology. Technology is a great servant but a terrible master. This is the most important book ever written about one of the most significant aspects of our lives: the consequences of our addiction to online technology and how we can liberate ourselves and our children from it. Dean Ornish, New York Times bestselling author of *Undo It*.
