development of prosperous social sciences are the eternal themes of human beings. At present, social science research and its results can hardly meet the needs of social development, especially the unscientific evaluation of social science results, which has aroused great concern from all walks of life and has produced dirt and questions on social science, thus affecting the proper development of social science. Max Weber once said that the most important function of social science in modern times is to keep people clear-headed and to resist the delusions of prophetic legislators. Humanities and arts are the process of perceiving, realizing, thinking, manipulating, and expressing objective or subjective objects through capturing and excavating feeling and analyzing, integrating, and applying or displaying the stage results in the form obtained through feeling, seeing, hearing, smelling, touching. The social sciences and humanities and arts contain content that will directly affect our lives and the way society functions. And by reacting to today's increasingly intricate problems and situations through systematic and professional discussions, they will further contribute to the improvement of institutions and the development of society. By thinking about issues and looking at problems and the world from different perspectives, by putting the two together, it may be possible to have more comprehensive, appropriate, and better responses. For example, the development of laws requires a deeper understanding of the environment in which they are implemented; international trade requires a certain understanding of the customs of different countries; and the development of tax and economic policies requires a certain understanding of the population, consumer demand, etc.

Spectrum Prof. Dr. Rajesh G. Konnur, Dr. Pratisha Kumari, Dr. Sukhwinder Singh, 2025-02-10. Spectrum 7th Edition marks yet another milestone in the continuum of global academic collaboration fostered through the International Conference on New Frontiers in Engineering, Science, Law, Management, Humanities, and Social Sciences (INFES 7.0 2025), proudly organized by Eudoxia Research University, USA. This edition embodies the essence of academic integrity, interdisciplinary research, and the relentless pursuit of innovative solutions for the challenges of our time. Held on January 30th and 31st, 2025, INFES 7.0 attracted a diverse spectrum of thinkers, scholars, scientists, legal experts, educators, engineers, social scientists, and policy makers who came together to share, debate, and forge new directions in research and development. In a world increasingly shaped by complex socio-economic and technological transformations, the conference provided a timely forum to explore new perspectives and methodologies across a multitude of disciplines. The Spectrum series was initiated to document and disseminate the wealth of knowledge exchanged at each edition of INFES. This 7th Edition is a testimony to the vibrancy and rigor of contemporary academic discourse. Each paper featured in this volume has undergone thorough peer review and represents a unique voice contributing to the expansion of knowledge across domains. Topics range from artificial intelligence and clean energy to inclusive education, legal frameworks for emerging technologies, women empowerment, climate policy, and sustainable development, showcasing the holistic approach of the conference. What makes Spectrum 7th Edition distinct is its emphasis on cross-border and cross-sector collaboration. Researchers from over 30 countries have contributed their insights, and the collected works reflect not only

theoretical advancements but also practical applications aimed at real world impact Through this synthesis of innovation and applicability the publication reaffirms the role of academia as a cornerstone of global development
