Good Meal Prep Ideas For Beginners and Dummies Barbara Dawson,2020-08-18 Meal prepping is making a meal or recipe then portioning it out to grab and go meals for later If you've ever kept your leftovers from dinner to take with you for lunch then next time you've already mini meal prepped Granted though meal prepping refers to making 3-7 days worth of food at a time Think of it like making your lunches for the week all at once instead of making lunch every day You can use this same technique for breakfast lunch dinner and snacks Meal prepping involves no waste and results in time to do other things outside of the kitchen whether that's planning a diet or a budget When making your meal plan the first question to ask is how many meals you'll eat each day without having to cook each day Meal prepping is not for everyone It is good for people who value convenience and free more time than cost With meal prepping you generally eat the same thing for a few days in a row so if you don't like leftovers or get bored with food meal prepping isn't for you If having nutritious food while maximizing your time and budget is important to you then trying something different every day meal prepping is a great idea I've generally never seen a meal prep for the month or maybe one other person do a whole month Meal prepping for a whole month would be quite difficult but it's not impossible and it would save a lot of time and money A food item stored in the refrigerator for a long time can lose its texture and flavor but the eater Always begin with the refrigerator guidelines but the FDA doesn't value them against your own preferences In general I don't think it's more than a few days worth of food you'll be able to eat before it goes bad
