Harnessing AI's Potential to Support Student Success and Teaching Excellence Araujo, Juan J., Snider, Sharla, 2025-07-15
With the integration of AI in educational environments AI has shaped the way schools operate and support students. Personalized learning platforms and tutoring systems have transformed the traditional schooling system for the better. However, the deployment of AI in school settings also raises critical questions around equity, privacy, ethical use, and the role of educators in a technology-enhanced landscape. Examining the impact of AI usage in schools is essential to understand both its potential to enhance educational outcomes and the challenges that must be addressed to ensure it serves all learners effectively and responsibly. Harnessing AI's Potential to Support Student Success and Teaching Excellence explores the landscape of AI in education and how it has helped and hindered school settings. This book highlights both the transformative potential of AI and the risks associated with its unchecked advancement, emphasizing the importance of responsible innovation in education. Covering topics such as education, AI, and technology, this book is an excellent resource for teachers, administrators, and policymakers searching for the right approach for such AI implementation. **Teaching Systematic Synthetic Phonics in Primary Schools** Wendy Jolliffe, David Waugh, Angela Carss, 2012-05-18 The government prioritizes systematic synthetic phonics as a key strategy in the teaching of reading, and this text supports trainee teachers working towards primary QTS in how to use phonics effectively. The text begins by examining the central role of phonics in the teaching of reading, drawing on recent research and initiatives. It goes on to cover the essential knowledge trainees need to acquire themselves for the teaching of phonics to children. Accessible and relevant, the text uses case studies and useful research to support trainees in becoming competent and confident in the teaching of phonics. Supplement this text with the companion audit and test book Teaching Systematic Synthetic Phonics Audit and Test. About the Transforming Primary QTS series: This series reflects the new creative way schools are beginning to teach, taking a fresh approach to supporting trainees as they work towards primary QTS. Titles provide fully up-to-date resources focused on teaching a more integrated and inclusive curriculum, and texts draw out meaningful and explicit cross-curricular links. Teaching with Artificial Intelligence Stamatios Papadakis, 2025-11-20 This book brings together global experts to explore the transformative potential of artificial intelligence (AI) in early childhood and primary education. Through a combination of theoretical insights and practical case studies, it examines how AI technologies can enrich learning, empower educators, and address key challenges from the evolving needs of young learners to ethical considerations, digital equity, and teacher preparedness. Topics covered in the book include AI-assisted bilingual language development, robot-supported pedagogy, generative AI integration, and AI-driven assessment tools. Through real-world examples and research-based strategies, the book demonstrates how AI can support personalised learning, foster creativity, and improve educational outcomes without replacing the vital role of teachers. It encourages educators to engage with AI in a confident and critical manner, offering guidance on implementation while

maintaining a strong focus on inclusion child development and responsible practice Written in clear accessible language this book is a practical guide to the opportunities and challenges of AI enhanced education in the years ahead This timely resource will appeal to educators researchers and students of educational technology early childhood education and primary education as well as policy professionals interested in understanding how to meaningfully integrate AI into early learning environments
