mobile phone devices and on demand services Intellectual property law specifically copyright in the music and entertainment industries is also explored in the book s later chapters Also new to this edition are sections on A focus on freedom of expression its philosophical foundations the struggles of those who have fought for it and the varied ways in which the courts interpret freedom of expression regarding the taking and publishing of photographs The right to be forgotten data breaches and the General Data Protection Regulation GDPR The media's increasing access to the courts particularly when considering the privacy of those who are suspected of sexual offences Press regulators broadcasting and advertising regulations and film and video regulations Election and party political broadcast regulations with a focus on social media and recent election fraud The emergence of online music distribution services internet radio and free digital streaming music services and their effect on the music industry. The fourth edition also features a variety of pedagogical features to encourage critical analysis of case law and one s own beliefs Controllable Artificial Intelligence and the Future of Law Hugo Luz dos Santos, 2025-11-08 This book broaches the newly crafted concept of algorithmic dictatorship that draws on a plethora of human biases that creep into the algorithm and feeds into an automated decision that comes to the expense of citizens lives freedoms health property fair lending and credit scoring This book sheds a keen light on the slew of reasons in view of which artificial intelligence should be both interpretable and controllable as opposed to merely explainable. The reason for that is straightforward the skewed data baked into the bigoted algorithms machine biases spawns harrowing effects with which criminal justice has been grappling for a long haul drawn out Tallyingly and perhaps unsurprisingly law enforcement evinces biases that run along both gender and race lines No surprise springs from the fact that computer generated algorithms that propel predictive policing are often flagged as tools whereby racial discrimination abounds It should not therefore be pegged as flabbergasting that this sort of shady algorithmic governance is a byproduct of a grueling algorithmic dictatorship that is shaping up to crumble the foundations of Rule of Law upon which stands modern societies This is one of the key takeaways of this book Disturbingly enough brain computer interfaces are poised to be converted into shady tools to collate gauge thoughts emotions sentiments and crime related information that would be otherwise inaccessible to the governments rogue nations or unscrupulous actors prying eyes Much to our dismay an eerily dystopian world is unfolding before our very eyes This is the gist of transhumanism a byproduct of convolutional neural networks that revolve around deep learning genetic algorithms that will overhaul the current legal landscape beyond recognition This book charts the path ahead as to draw set in stone boundaries to prevent jurisdictions from careening into the chaos of genetic plutocracy that should be wished away OCR GCSE (9-1) Business, Third Edition Mike Schofield, Alan Williams, 2017-09-11 Exam Board OCR Level GCSE Subject
